I. What is Accounting?

- ☞ Something to do with money? Working with math and numbers? That's what most students say when I ask them that question. It's my job this semester to provide you with a better answer!
- ☞ Basically accounting has to do with planning, recording, analyzing and interpreting financial information. In this class we will spend time breaking this down and seeing what it means in the real world.

II. What will be taught in Accounting?

- ☞ Career opportunities – in and out of business related majors
- ☞ Accounting procedures for a small business. We will go through the process of setting up a new business and keeping all of the records for that business.
- ☞ Accounting procedures for a business organized as a partnership.
- ☞ Business simulation! This is an amazing culminating activity. We will spend the last three weeks of the semester doing all of the accounting work for a business organized as a partnership. This includes journalizing transactions, posting, preparing financial statements, issuing checks and performing closing entries at the end of the fiscal period.

III. IB and Accounting?

- ☞ Ann Arbor Huron is an IB designated world school!
- ☞ MISSION: The Huron High School Career and Technical Education (CTE) department promotes equity and access for all Ann Arbor Public Schools students to CTE courses. Classes are inquiry-based, hands-on, and incorporate global awareness through real-world problem solving activities. The CTE department prepares students for employment and/or higher education through collaboration with local business and industry partners. Leadership and community service opportunities are available through career and technical student organizations such as BPA, DECA, FCCLA, HOSA, and SkillsUSA.
- ☞ Over the next two years, I will continue to add curriculum and research based practices that embrace the IB pillars of inquiry, global awareness, action and service, and access and equity.
- ☞ We will also stress the IB learner profile in class. More information on the Learner Profile can be found at: <http://www.ibo.org/en/benefits/learner-profile/>

The Robot Factory Joseph Ganem, 2018-08-27 This book exposes a disturbing misuse of the scientific method to advance policies and agendas that are in fact detrimental to both science and education The author a physics professor examines two related trends in education the practice of data driven reform and the disparaging of the traditional liberal arts in favor of programs with a heavy emphasis on science and technology Many of the reforms being foisted on educators have more in common with pseudo science than real science The reduction of education to a commodity and the shilling of science as a means to enhance corporate profits lead to an impoverished and stunted understanding of science in particular and of education in general How is it possible for schools with all students learning at grade level to be rated as failing teachers to be rated as ineffective after all their students meet their learning outcomes rising grade school math standards to result in more college students needing remedial math politicians to disparage scientists and their results but argue that more students should study science These bizarre outcomes have happened and are the result of an education system that misuses and misrepresents math and science in the classroom and in crafting education policies This book exposes the flawed and fallacious thinking that is damaging education at all levels throughout the United States and makes a compelling case for rethinking the standardized optimized and quantified approaches in vogue in education today to accommodate the different needs of individual teachers and students
