Balog, 2016-07-14 A graduate text and professional reference covering all aspects of microgrid design and applications **Sparse Grids and Applications** Jochen Garcke, Michael Griebel, 2012-10-13 In the recent decade there has been a growing interest in the numerical treatment of high dimensional problems It is well known that classical numerical discretization schemes fail in more than three or four dimensions due to the curse of dimensionality The technique of sparse grids helps overcome this problem to some extent under suitable regularity assumptions This discretization approach is obtained from a multi scale basis by a tensor product construction and subsequent truncation of the resulting multiresolution series expansion This volume of LNCSE is a collection of the papers from the proceedings of the workshop on sparse grids

and its applications held in Bonn in May 2011 The selected articles present recent advances in the mathematical understanding and analysis of sparse grid discretization Aspects arising from applications are given particular attention

Translating Growth into Poverty Reduction Flora Lucas Kessy, Oswald Mashindano, Andrew Shepherd, Lucy Scott (Research officer), 2013 Tanzania is a politically stable much aided country that has consistently grown economically during the first decade of the millennium while also improving its human development indicators However poverty has remained persistent particularly within rural areas This collaborative work delves into the reasons why this is so and what can be done to improve the record The book is the product of both Tanzanian and international poverty experts based on largely qualitative research undertaken within Tanzania by the Chronic Poverty Research Centre CPRC The authors highlight and discuss the importance of macro and micro level causes of the persistence of poverty The latter on which the book is focused centre around a negative dynamic affecting a large number of poor households in which widespread failure to provide household food security undermines gender relationships and reduces the possibility of saving and asset accumulation which is necessary for escaping poverty This results in very low upward mobility Vulnerability is widespread and resilience against
