generate me a moderate level of programs in java

Here are a few moderate-level Java programming challenges that cover a variety of concepts, including data structures, algorithms, and object-oriented programming principles:

1. Palindrome Checker Using Recursion

Write a program that checks if a given string is a palindrome using recursion. A palindrome is a word or phrase that reads the same backward as forward.

Requirements:

- Implement a recursive method to check the palindrome.
- Consider edge cases like ignoring spaces, punctuation, and case sensitivity.

java

```
public class PalindromeChecker {
    public static boolean isPalindrome(String str) {
        // Remove non-alphanumeric characters and convert to lowercase
        str = str.replaceAll("[^a-zA-Z0-9]", "").toLowerCase();

        // Call the recursive method
        return checkPalindrome(str, 0, str.length() - 1);
    }

    private static boolean checkPalindrome(String str, int left, int right) {
        if (left >= right) {
            return true;
        }
        if (str.charAt(left) != str.charAt(right)) {
            return false;
        }
        return checkPalindrome(str, left + 1, right - 1);
    }

    public static void main(String[] args) {
        String input = "A man, a plan, a canal, Panama";
        System.out.println(isPalindrome(input) ? "Palindrome" : "Not a palindrome");
    }
}
```
