**Electrical, Information Engineering and Mechatronics 2011** Shaobo Zhong, Fuzhong Wang, 2012-03-14 As future generation electrical information engineering and mechatronics become specialized and fragmented it is easy to lose sight of the fact that many topics in these areas have common threads and because of this advances in one discipline may be transmitted to others The 2011 International Conference on Electrical Information Engineering and Mechatronics EIEM 2011 is the first conference that attempts to follow the above idea of hybridization in electrical information engineering mechatronics and applications This *Proceedings of the 2011 International Conference on Electrical Information Engineering and Mechatronics* provides a forum for engineers and scientists to address the most innovative research and development including technical challenges and social legal political and economic issues and to present and discuss their ideas results works in progress and experience on all aspects of electrical information engineering mechatronics and applications Engineers and scientists in academia industry and government will find a insights into the solutions that combine ideas from multiple disciplines in order to achieve something more significant than the sum of the individual parts in all aspects of electrical information engineering mechatronics and applications Flexible Test

Automation Pasquale Arpaia, Vitaliano Inglese, 2014-12-31 In laboratory management of an industrial test division a test laboratory or a research center one of the main activities is producing suitable software for automatic benches by satisfying a given set of requirements This activity is particularly costly and burdensome when test requirements are variable over time If the batches of objects have small size and frequent occurrence the activity of measurement automation becomes predominating with respect to the test execution Flexible Test Automation shows the development of a software framework

as a useful solution to satisfy this exigency The framework supports the user in producing measurement applications for a wide range of requirements with low effort and development time ISTFA 2011 ,2011 **LabView Core 1** ,2011

Rodríguez Torres,Carmen Pizarro,Ligia Edith Zamora Alfonso,2014-03-27 Proceedings of the Thirteenth Latin American Conference on the Applications of the Mossbauer Effect Medellin Colombia November 11 16 2012 The broad scope of the Applications of the Mossbauer Effect to interdisciplinary subjects makes this volume an outstanding source of

information to researchers and graduate students who will find the unique results of Mossbauer spectroscopy a valuable aid and complement to their research in conjunction with other techniques In this volume applications to mineralogy catalysis soil science amorphous materials nanoparticles magnetic materials nanotechnology metallurgy corrosion and magnetism have been put together in original works produced by invited speakers and different research teams across the continent Reprinted from Hyperfine Interactions HYPE Volume **MATLAB** Vasilios Katsikis, 2012-09-26 This is the first book in a three volume series deploying MATLAB based applications in almost every branch of science This volume presents interesting topics from different areas of engineering signal and image processing based on the MATLAB environment The book consists of 20 excellent insightful articles and the readers will find the results very useful to their work This collection of high quality articles refers to a large range of professional fields and may be used for scientific engineering and educational purposes Characterisation of Soft Magnetic Materials Under Rotational Magnetisation Stanislaw Zurek, 2017-11-22 The book presents practical aspects related to the measurement of rotational power loss in soft magnetic materials The book furthermore focuses on practical aspects of performing such measurements the associated difficulties as well as solutions to the most common problems Numerous practical aspects hands on experience and most commonly encountered pitfalls are heavily discussed in the book The text begins with introduction to magnetism then follows with definitions of measurement methods of rotational power loss from physical viewpoint Two chapters describe and detail the various sensors which can be employed for such measurements as well as all the aspects of designing making and using a magnetising apparatus A synthesis of the likely optimal design of a magnetising apparatus is also given preceded with the full reasoning based on all the research carried out to date Characterisation of Soft Magnetic Materials Under Rotational Magnetisation serves as an excellent starting point for any student having to perform magnetic measurements under rotational magnetisation but also under 1D 2D or 3D excitation Because the methods sensors and apparatus are extensively discussed it will also be a great reference for more senior researchers and experts in the field There is a whole chapter devoted to analysis of measurement uncertainty This subject is rarely published for magnetic measurements which makes it more difficult for all researchers to understand the concepts and methodology used in uncertainty estimation This chapter not only introduces the whole subject but also provides multiple step by step examples which can be easily followed from very simple cases to much more complex ones All equations are presented with full SI units which greatly helps in practical application of the presented methodology Each chapter is written in such a way that it can be studied on its own so that the reader can focus only on the specific aspects as required *Modeling, Programming and Simulations Using LabVIEW™* Software Riccardo de Asmundis, 2011-01-21 Born originally as a software for instrumentation control LabVIEW became quickly a very powerful programming language having some peculiar characteristics which made it unique the simplicity in creating very effective Users Interfaces and the G programming mode While the former allows designing very professional

controls panels and whole Applications completed with features for distributing and installing them the latter represents an innovative and enthusiastic way of programming the Graphical representation of the code The surprising aspect is that such a way of conceiving algorithms is absolutely similar to the SADT method Structured Analysis and Design Technique introduced by Douglas T Ross and SofTech Inc USA in 1969 from an original idea of MIT and extensively used by US Air Force for their projects LabVIEW practically allows programming by implementing straightly the equivalent of an SADT actigram Beside this academical aspect LabVIEW can be used in a variety of forms creating projects that can spread over an enormous field of applications from control and monitor software to data treatment and archiving from modeling to instruments controls from real time programming to advanced analysis tools with very powerful mathematical algorithms ready to use from full integration with native hardware by National Instruments to an easy implementation of drivers for third party hardware In this book a collection of different applications which cover a wide range of possibilities is presented We go from simple or distributed control software to modeling done in LabVIEW from very specific applications to usage in the educational environment
