Lyll Watson Romeo Error:

The Romeo Error Lyll Watson, 1975 The only thing that makes death distinct from all other diseases and disorders is that everybody gets it writes Lyll Watson Here he presents an intriguing and completely original look at our ideas of and our knowledge about that inescapable phenomenon which he suggests may be only the beginning of a far more fantastic existence than what we call life Combining fifteen years scientific research with his own theories and experiences Watson discusses all that is known about the biology of life and therefore of death He explores the very real problem of deciding when death actually occurs and considers our psychological and social attitudes toward death to show how we are programmed from childhood not to look beyond it But death may in no way be final he speculates describing the many varieties of reincarnation the activities of spiritualists and both out of the body and other body experiences as manifestations of another realm of being Focusing on these extraordinary happenings The Romeo Error leaves little doubt that there is far more to both life and death than we are able to comprehend by the poor evidence of our five senses that in fact the two may be indistinguishable with what we call death merely a change of state often temporary and sometimes even curable front and back flaps

In My Ever After Robert Geis, 2010-08-26 In My Ever After is not a mass media style general readership book on immortality rather it is an argument against a current school neurophilosophy s virtual equation of consciousness and the world Without exposing the equation s weaknesses the question of immortality Geis argues is moot Part I identifies many epistemic and scientific grounds for a real world outside consciousness and self refutational flaws in quantum physics It employs the phenomenological method to situate consciousness and other in their relations Part II sets forth why consciousness cannot be electrical in origin and then how partibility and subjectivity in tandem with the power of conceptualization evince reasons for accepting immortal consciousness as a condition of all human awareness A discussion of why pharmacologic explanations for the OBE and NDE are wanting plus neurologic arguments for memory s non localizability and how animal sentience adds to philosophic conviction coordinate with Scripture on animal existence beyond
