Incommons Community Organizing:

Innovative Community Change Practices Norman Walzer, Sam Cordes, 2017-10-02 The national recession forced many communities to examine new and innovative ways to promote local economic development resulting in long term community changes New techniques and approaches were used to identify available opportunities and programs which could take advantage of development opportunities A common theme among the contributions to this book is a focus on building leadership capacity and several chapters discuss the successful practices which are aimed at bringing new leaders into local development efforts Especially important are ways to identify youth and young adults and designing programs that bring them into active leadership roles within community development efforts On a broader scale several authors present material regarding building local entrepreneurship capacity and recognizing that entrepreneurs at different stages in their development have different training and support needs The discussions in this book will help local policymakers and development practitioners better understand the various development techniques and find ways to build capacity within their community stimulating development This information will be especially useful for groups interested in engaging youth and populations who in the past have not been especially active in discussions about community and economic development This book was originally published as a special issue of Community Development

Extra Mile America: Stories of Inspiration, Possibility and Purpose Shawn Anderson, 2010-09-01 To symbolize the power of the go the extra mile message Shawn Anderson pedaled a bicycle from ocean to ocean solo Along the way he interviewed over two hundred inspirational Americans who had demonstrated a remarkable ability to overcome personal setback and accomplish something extraordinary A blind woman who climbed one of the world's tallest mountains a triathlete who was born a congenital amputee a 95 year old who has been volunteering at the same hospital for 49 years a corporate executive who gives away 82% of his company's profits these are a few of the inspirational profiles highlighted in Extra Mile America The stories in this book have the power to inspire your spirit challenge you to reevaluate your own life setbacks and motivate you to take a deep breath of courage in order to get back on your own metaphorical bike with a renewed passion and purpose

Community-Based Interventions John W. Murphy, 2014-01-02 For decades community centered social services have been promoted as an admirable ideal Yet the concept of decentralized services delivered where people live has proved to be an elusive ideal as well with the promise of empowerment often giving way to disinterest and apathy Community Based Interventions examines the reasons community programs tend to founder and proposes a realistic framework for sustained success The book's theoretical philosophical and political foundations begin with the importance of context as in local knowledge and community self definition and engagement Innovative often startling approaches to planning design and implementation begin with the recognition that communities are not targets or locations to be fixed but social realities whose issues require concrete answers The variety of examples described in these chapters demonstrate the power of community

interventions in providing effective services reducing inequities and giving individuals greater control over their health their environment and in the long run their lives Included in the coverage Redefining community the social dimensions A new epidemiology to inform community work The role of research in designing community interventions The conceptual flow of a community based project Building autonomy through leadership from below Relating social interventions to social justice Attuned to the current era of health and mental health reform Community Based Interventions represents a major step forward in its field and makes an inspiring text for social workers clinical social workers public health administrators and community activists

Subterranean Politics in Europe Mary Kaldor,Sabine Selchow,Tamsin Murray-Leach,2015-07-06 The demonstrations and occupations that emerged across Europe in 2011 12 struck a chord in public opinion in a way that has not been true for many years Based on research carried out across the continent this volume investigates why this is occurring now and what they tell us about the future of the European project

Building Commons and Community Karl Linn,2007-02 The late Karl Linn s opus work about the shared spaces neighbors can create together

Theorizing the Sharing Economy Indre Maurer,Johanna Mair,Achim Oberg,2020-04-10 This volume takes advantage of this opportunity by presenting a collection of empirical and conceptual work that explores the variety and the trajectories of new forms of organizing in the sharing economy and in doing so builds on rejuvenates and refines existing organization theories

Property and Community Gregory S. Alexander,Eduardo Moisés Peñalver,Eduardo M. Peñalver,2010 Property and Community fills a major gap in the legal literature on property and its relationship to community The essays included differ from past discussions including those provided by law and economics by providing richer accounts of community By and large prior discussions by property theorists treat communities as agglomerations of individuals and eschew substantive accounts of justice favoring what Charles Taylor has called procedural conceptions These perspectives on ownership obscure the possibility that the community might have a moral status that differs from neighboring owners or from non owning individuals This book examines a variety of social practices that implicate community in its relationship to property These practices range from more obvious property based communities like Israeli kibbutzim to surprising examples such as queues Aspects of law and community in relationship to legal and social institutions both inside and outside of the United States are discussed Alexander and Pe alver seek to mediate the distance between abstract theory and mundane features of daily life to provide a rich textured treatment of the relationship between law and community Instead of defining community in abstractly theoretical terms they approach the subject through the lens of concrete institutions and social practices In doing so they not only enrich our empirical understanding of the relationship between property and community but also provide important insights into the concept of community itself
