The Land Question in India Anthony P. D'Costa, Achin Chakraborty, 2017-04-06 This volume takes a fresh look at the land question in India Instead of re engaging in the rich transition debate in which the transformation of agriculture is seen as a necessary historical step to usher in dynamic capitalist or socialist development this collection critically examines the centrality of land in contemporary development discourse in India Consequently the focus is on the role of the state in pushing a process of dispossession of peasants through direct expropriation for developmental purposes such as acquisition of land by local states for infrastructure development and to support accumulation strategies of private business through industrialization Land in India is sought for non agricultural purposes such as purchasing land to reduce risk and real estate development Land is also central to tribal communities adivasis whose livelihoods depend on it and on a moral economy that is independent of any price driven markets Adivasis tend to hold on to such property not as individual owners for profit but for collective security and to protect a way of life Thus land notwithstanding its role in the accumulation process has been and continues to be a turbulent arena in which classes castes and communities are in conflict with each other with the state and with capital jockeying to determine the terms and conditions of land transactions or their prevention through both market and non market mechanisms The volume goes beyond the traditional political economy of the agrarian transition question and deals with inter alia distributional

conflicts arising from acquisition of land by the state for capital accumulation on the one hand and its commodification on the other. It provides new analytical insights into the land acquisition processes, their legal, institutional and ethical implications, and the multifaceted regional diversity of acquisition experiences in India. Inequality around the World Deric Shannon, 2025-02-06. Each chapter compares and contrasts conditions in major countries including the USA, Russia, India, China and Germany as well as in wider regions like the Middle East, West Africa, Central America and Eastern Europe. Scrupulously researched and wide ranging in coverage, Inequality around the World provides an in depth survey of socioeconomic inequality in the 21st century in all its many forms.

The Transnationalized Social Question Thomas Faist, 2018-11-30. The social question is back. Yet today's social question is not primarily between labour and capital as it was in the nineteenth century and throughout much of the twentieth. The contemporary social question is located at the interstices between the global South and the global North. It finds its expression in movements of people seeking a better life or fleeing unsustainable social, political, economic and ecological conditions. It is transnationalized not only because migrants and their significant others entertain ties across the borders of national states, staying in touch with family and friends, receiving or sending financial remittances in transnational social spaces. Also of importance are cross border recruitment schemes for workers and the cross border diffusion of norms appealed to in the case of migration, for example the social right to decent work as a human right. Moreover, migration can become an issue of inclusion or exclusion in fields important to life chances in the emigration, transit or immigration states, a transnationalization of national states. And as in the nineteenth century, political conflicts arise constituting the social question as a public concern. In earlier periods, class differences dominated conflicts. While class has always been criss crossed by manifold heterogeneities, not least of all cultural ones around ethnicity, religion and language, it is these latter heterogeneities that have sharpened in situations of immigration and emigration over the past decades. Casting a wide net in terms of conceptual and empirical scope, this book tackles both the social structure and the politics of social inequalities. It sets a comprehensive agenda for research which also includes the public role of social scientists in dealing with the transnationalized social question.
