

Exponents

An **exponent** is a quick and easy way to show how many times you multiply a number times itself.

The **base** is the number that will be multiplied to itself. The base can be a whole number, a fraction, or sometimes even a decimal, or integer such as a negative number.

The **exponent** is the number of times you multiply the base to itself. The exponent could be any digit. **REMEMBER: YOU NEVER MULTIPLY THE BASE TIMES THE EXPONENT.** $4^2 \neq 4 \times 2$.

There are two ways to read the numbers above. Four to the second power or four squared. Both ways are acceptable. This example: 2^3 is read as two-to-the-third power or two cubed.

A number **squared** means you multiply the base by itself two times. A number **cubed** means to multiply the base by itself three times.

Here are examples:

$5^2 = 5 \times 5 = 25$ The base is 5, the exponent is 2. You multiply the base by itself two times.

$2^3 = 2 \times 2 \times 2 = 8$ This time you multiply the base, which is 2, by itself three times.

$7 \times 7 \times 7 \times 7 = 7^4$ You can also rewrite numbers multiplied to themselves back into an exponent.

Here are a couple of special rules when using exponents: $5^0 = 1$ $5^1 = 5$

A number raised to the power of zero equals 1. If raised to the power of one, it equals itself.

You use exponents in geometry as well. Notice the formulas for the area or volume of a figure:

Area of a Square: S^2 = the length of a side of a square multiplied by itself is the area.

Volume of a Cube: S^3 = the length of a side of a cube multiplied by itself three times is the volume.

Exponents are also very helpful with scientific notation. **Scientific notation** is basically a shortened way of writing long numbers. The number 120,000,000,000,000 is 120 trillion.

Pedagogy in a New Tonality Peter Gouzouasis, 2012-01-01 This is a book for teachers by teachers from elementary school to university level classrooms It is about the use of creative instructional strategies in K 12 classroom settings and the transformations the teachers made in their journeys from being traditional practitioners to becoming pedagogical in their approaches to teaching and learning across the curriculum Over twenty teachers conducted research in their classrooms on the implementation of creative strategies tactics graphics organizers and visual journals in teaching and learning They have written their inquiries in a narrative style informed by various forms of arts based educational research Their research is approachable and usable by other teachers who are interested in becoming reflective reflexive practitioners Many of the strategies tactics and graphics organizers are described by Barrie Bennett in his widely used textbook *Beyond Monet The Artful Science of Instructional Intelligence* However through their journeys of becoming teacher learner researchers many discovered numerous creative variations of Bennett's work as it was implemented in their classrooms While there are many professional books that provide ideas on collaborative learning and creative teaching approaches there is very little published research on the efficacy of these concepts in the K 12 classroom These inquiries provide practical insights into how inspired teachers can conduct research on improving their own practice as well as on greatly improving their students learning Thus this book has widespread interest for teachers and administrators who seek to implement systemic changes in the ways that teachers teach and children learn in the 21st century Teaching Secondary and Middle School Mathematics Daniel J. Competencies and the Impact of Digitalization Dhir, Harpreet Kaur,2021-06-25 The need to develop 21st century competencies has received global recognition but instructional methods have not been reformed to include the teaching of these skills Multiple frameworks include creativity critical thinking communication and collaboration as the foundational competencies Complexities of planning curriculum and delivering instruction to develop the foundational competencies requires professional training However despite training instructional practice can be impacted by barriers caused by personal views of teachers economic constraints access to resources social challenges pandemic overwhelming pace of global shifts and other influences With digitalization entering the field of education it is unclear if technology has helped in removing or eliminating the barriers or has itself become another obstruction in integrating the competencies Gaining an educator's perspective is essential to understanding the barriers as well as solutions to mitigate the impediments through innovative instructional methods being practiced across the globe via digital or non digital platforms The need for original contributions from educators exists in this area of barriers to 21st century education and the role of digitalization The Handbook of Research on Barriers for Teaching 21st Century Competencies and the Impact of Digitalization discusses teaching the 21st century competencies namely critical thinking creativity collaboration and communication This book presents both the problems or gaps causing barriers and brings forth practical solutions digital and non digital to meet the educational shifts The chapters will determine the specific barriers that exist whether political social economic or technological to integrating competencies and the methods or strategies that can eliminate these barriers through compatible instructional approaches Additionally the chapters provide knowledge on the impacts of digitalization in general on teaching and learning and how digital innovations are either beneficial to removing impediments for students or rather causing obstructions in integrating the four competencies This book is ideally intended for educators and administrators working directly with students educational researchers educational software developers policymakers teachers practitioners and students interested in how 21st century competencies can be taught while facing the impacts of digitalization on education *Math Instruction for Students with Learning Problems* Susan Perry Gurganus,2017-02-24 Math Instruction for Students with Learning Problems Second Edition provides a research based approach to mathematics instruction designed to build confidence and competence in pre and in service PreK 12 teachers This core textbook addresses teacher and student attitudes toward mathematics as well as language issues specific mathematics disabilities prior experiences and cognitive and metacognitive factors The material is rich with opportunities for class activities and field extensions and the second edition has been fully updated to reference both NCTM and CCSSM standards throughout the text and includes an entirely new chapter on measurement and data analysis **Teachers Engaged in Research** Laura R. Van Zoest,2006-03-01 This

book provides examples of the ways in which 9 12 grade mathematics teachers from across North America are engaging in research It offers a glimpse of the questions that capture the attention of teachers the methodologies that they use to gather data and the ways in which they make sense of what they find The focus of these teachers investigations into mathematics classrooms ranges from students understanding of content to pedagogical changes to social issues Underlying the chapters is the common goal of enabling students to develop a deep understanding of the mathematics they learn in their classrooms

AF Manual United States. Department of the Air Force,1957 *A New Era of Transformation in Ghana* Clemens Breisinger,Xinshen Diao,Shashidhara Kolavalli,Ramatu M. Al-Hassan,James Thurlow,2011-01-01 Several Sub Saharan African nations have experienced increased economic growth and political stability in recent years compared with the stagnation and turmoil of previous decades Ghana is one of the biggest success stories of the region the nation has enjoyed an annual average of five percent economic growth for the past 20 years and will probably be the first Sub Saharan African country to achieve the Millennium Development Goal of cutting poverty in half by 2015 This study examines how Ghana can build on its achievements and possibly serve as a model for other African countries By drawing on existing literature and applying a highly disaggregated dynamic general equilibrium model to Ghana s experiences the authors identify certain necessary factors for further economic development in the country These requirements include continued political stability growth in manufacturing improved domestic services such as transportation and agricultural development that goes beyond past reliance on cash crops such as cocoa to include major staples and livestock This kind of broad based growth will benefit the entire economy thereby reducing poverty The authors analysis provides an economic development strategy for Ghana and possibly other countries in the region to policymakers development specialists and others concerned with Sub Saharan Africa
