Steel William Metcalf, 1899 **Steel: A Manual for Steel-Users** William Metcalf, 2015-06-02

Excerpt from *Steel A Manual for Steel Users*: Twenty Seven years of active practice in the manufacture of steel brought the author in daily contact with questions involving the manipulation of steel, its properties, and the results of any operations to which it was subjected. Blacksmiths, edge tool makers, die makers, machine builders, and engineers were continually asking questions whose answers involved study and experiment. During these years the Bessemer and the open hearth processes were developed from infancy to their present enormous stature, and the shadows of these young giants ever menacing to the expensive and fragile crucible kept one in a constant state of watching anxiety, and more study. The literature of steel has grown with the art; its books are no longer to be counted on the fingers; they are to be weighed in tons. Then why write another? Because there seems to be one little gap. Metallurgists and scientists have worked
