Laboratory Manual For Applied Botany:

Laboratory Manual for Applied Botany Karen McMahon, Estelle Levetin, Rob Reinsvold, 2001-07-16 Science education is experiencing a revitalization as it is recognized that science should be accessible to everyone not just society's future scientists. One way to make the study of science more substantive to the non-major is to require a laboratory component for all science courses. The subject of applied botany with its emphasis on the practical aspects of plant science the authors believe will be appealing to the non-major as it exemplifies how a basic science can be applied to problem solving. **Laboratory Manual for Applied Botany** will make students realize that the study of plants is relevant to their lives and that they can participate in the discovery process of science. Although the manual includes much of the basic plant anatomy found in standard botany manuals it differs in taking a practical approach examining those plants and plant products that have sustained or affected human society. **Plants and Society with Lab Manual for Applied Botany** Estelle Levetin, Karen McMahon, 2010-06-18 This introductory one quarter one semester text takes a multidisciplinary approach to studying the relationship between plants and people. The authors strive to stimulate interest in plant science and encourage students to further their studies in botany. Also by exposing students to society's historical connection to plants Levetin and McMahon hope to instill a greater appreciation for the botanical world. **Plants and Society** covers basic principles of botany with strong emphasis on the economic aspects and social implications of plants and fungi. Although the lab manual includes much of the basic plant anatomy found in standard botany manuals it differs in taking a practical approach examining those plants and plant products that have sustained or affected human society. **Botany Lab Manual, BIO 103** Susan Lamont, 2014 **A Laboratory Manual in Practical Botany** Charles Herbert Clark, 1898 **Ebook: Plants and Society** Estelle Levetin, Karen McMahon, 2014-10-16 This introductory one quarter one semester text takes a multidisciplinary approach to studying the relationship between plants and people.
