Business Highlights & Best Practices

Mauritius: 20% Reduction in Customer Delivery Lead Time

In line with our ambition to continually improve the service at the terminal, an extensive analysis of the cement delivery lead time was conducted in 2013. The Terminal Manager, Mr. Yogesh Soowamber and his team designed a clear action plan with the goal to shorten the customer's waiting time inside the terminal:

- Better coordination and cross-functional communication
- Implementing "Total Productive Maintenance" techniques to reduce breakdown frequency – well-planned equipment maintenance and proper follow-ups to ensure that all repairs are performed without disturbing the operations
- Properly managed stocks to ensure availability of critical spare parts

Moreover, an improved inventory and planning of cement intake was established. And the pursuit of lead-time reduction forced us to eliminate other inefficiencies.

The benefits of reducing customer lead times are substantially increased customer demand, reduced unit cost, shorter forecast horizons, less safety stock – which at the end leads to a better market position.

With these actions in place, the reduced lead times give us a clear edge towards our main competitor and we received a lot of positive feedback from our clients. In 2014 we will continue raising the bar to guarantee service excellence and to keep our customers happy!
