Denis Donovan, M.D., Deborah McIntyre, R.N., 2000-10* An invaluable book that does for parents and their young children what You Just Don't Understand did for men and women Did you know that when you say How many times have I told you not to your toddler thinks you are actually changing the subject rather than reiterating a question Based on years of clinical experience and original child development research What Did I Just Say shows how conventional communication styles actually prevent parents from saying what they mean and cause children to hear something entirely different than what was intended The authors demonstrate how a simple understanding of the logic of language and of childhood thinking can dramatically improve parent child communication Among the subjects covered are understanding the complex experiential world of young children putting structure rules and boundaries into children's lives while still fostering individuality encouraging healthy emotional responsiveness and interpersonal sensitivity while decreasing anger and aggression focusing a child's attention and foiling behaviors such as tuning out and forgetting By helping parents understand the very different linguistic and experiential world of children What Did I Just Say offers a foundation for parent child communication that will last a lifetime **Human**

Reproduction Elsayed Saad Eldin Hafez, 1980 *Fair Isn't Always Equal Rick Wormeli, 2006* Differentiated instruction is a nice idea but what happens when it comes to assessing and grading students What's both fair and leads to real student learning Fair Isn't Always Equal answers that question and much more Rick Wormeli offers the latest research and common sense thinking that teachers and administrators seek when it comes to assessment and grading in differentiated classes Filled with real examples and gray areas that middle and high school educators will easily recognize Rick tackles important and sometimes controversial assessment and grading issues constructively The book covers high level concepts ranging from rationale for differentiating assessment and grading to understanding mastery as well as the nitty gritty details of grading and assessment such as whether to incorporate effort attendance and behavior into academic grades whether to grade homework setting up grade books and report cards to reflect differentiated practices principles of successful assessment how to create useful and fair test questions including how to grade such prompts efficiently whether to allow students to re-do assessments for full credit This thorough and practical guide also includes a special section for teacher leaders that explores ways to support colleagues as they move toward successful assessment and grading practices for differentiated classrooms

Global Debates, Local Dilemmas Tran Minh Hang, 2018-12-20 The practice of sex selective abortion is on the rise globally stirring debates about gender inequality medical ethics and reproductive autonomy This book is the first ethnography to document practices of sex selection in Viet Nam It shows how and why abortions are used to select the sex of children and how Vietnamese individuals and health professionals are implicated in this illicit and controversial practice Telling the stories of women who have undergone sex selective abortions it traces their passage through sex determination and abortion decision making phases and investigates their experiences during and after their sex selective abortions It

describes the turmoil experienced by individuals who undergo such abortions and explores their interactions with the spectrum of social actors and health institutions that facilitate practices of sex selection. As the first ethnographic study on sex selective abortions in Viet Nam, this book delves into socially sensitive terrain and sheds light on personally fraught individual experiences of reproductive agency. It documents societal responses to sex selective abortions in Viet Nam and identifies gaps in the state's capacity to regulate reproductive desire in a marketised economy. A resource for researchers, it contributes to ongoing debates on sex selection and provides a framework for developing relevant social policies, interventions and support services. This pioneering study offers a nuanced and sensitive account of sex selective abortion as human experience. Through thought provoking case studies, the book provides rare ethnographic documentation of the complex quandaries that arise as selective reproductive technologies are routinised across the globe. Female Fertility and the Body Fat Connection Rose E. Frisch, 2004-05. Are girls entering puberty earlier than they used to? This question, which has been debated recently by doctors and scientists in the pages of Time magazine and the New York Times, proves that there is still a great deal to learn about women's reproductive health. Female Fertility and the Body Fat Connection is the record of one scientist's groundbreaking and decades long work on the connections among fertility, body fat and reproductive health in women. Rose E. Frisch explains here how, in women, a certain amount of body fat is crucial to the reproductive system and sexual maturation. Women who are too lean are infertile and cannot conceive children; young girls who are too thin have a delayed onset of their first period. Female Fertility and the Body Fat Connection illuminates how and why a critical fitness level underlies a woman's reproductive health. In the process, Frisch gives readers a comprehensive view of the research done to date on the relationship between body composition and fertility and also describes her own journey as a woman scientist working to advance her critical fitness hypothesis both to the general public and the scientific community. Frisch answers the questions every woman has about the desirable weight for health and fertility and even includes tables to help women find their own best weight. She also demonstrates how important diet and exercise are for the long term reproductive health of women and shows what factors influence the onset of puberty in girls. Each milestone of the reproductive life span is affected by food intake and energy output; the factors affecting the storage of fat. Female Fertility and the Body Fat Connection is a cornerstone to understanding the health of girls and women.
