other Detroit manufacturers didn't produce anything that was quite like it The new little Bronco had utility and charm and it
was more refined than the Jeep of the era The larger second generation Bronco arrived in 1978 as a competitor to the
Chevrolet Blazer As with the Blazer the Bronco shared several parts with its company's half-ton truck that was offered at the
time so the Bronco and Blazer lost some of their originality However the Bronco had a following and various generations of
full size Broncos were manufactured following the development of the F 150 until 1996 At that time market forces dictated a
change to a vehicle that was more practical such as the Ford Expedition which replaced the Bronco After a 25 year absence
in the marketplace consumers decided that they were tired of large utilitarian SUVs and wanted a modern version of the
original Bronco In response to consumer demand and nostalgia an entirely new generation of Bronco was launched in 2021
However the planning process began several years earlier Ford confirmed the return of the Bronco at the 2017 North
American International Auto Show and spent the next four years building excitement for the vehicle's launch Many Broncos
were backordered and wait times were long After the launch of the new sixth generation Bronco the enthusiast community
and aftermarket manufacturers went into overdrive which was encouraged by Ford In New Ford Bronco Performance
Modifications off-road veteran and expert Don Alexander assembled this guide which includes options to make the new
Bronco an even more capable vehicle Covered are model histories suspension brakes tires electronics tops armor recovery
drivelines overlanding and more If you already have a Bronco that you want to modify or you are thinking about purchasing
