

Replace and secure the terminal block lid on the sounder with a #2 Phillips screwdriver.

**NOTE:** The sounder does not operate when the lid is removed.

## Grounding the Sounder

The chassis ground post is located on the exterior of the chassis, adjacent to a corner mounting hole.

- 1 Connect the chassis ground post to the boat water ground circuit.

- 2 Mount the sounder ([Mounting the Sounder](#)) and connect the power, marine network, transducer, and sensors ([Connecting the Sounder](#)).

## Installing Locking Rings on the Cables

Before you install locking rings on the cables, you must route the cables.

To help make the cable-routing process easier, the locking rings are packaged separately from the cables. Each locking ring is packaged in a small bag with a number on the label for easy identification.

- 1 Separate the two halves of the locking ring ①.

- 2 Align the two halves ② of the locking ring over the cable and snap them together.
- 3 Insert the o-ring ③ into the end of the connector.

## Transducer Wiring Diagrams

### NOTICE

Connecting the high-frequency wires to the low-frequency terminal block, or the low-frequency wires to the high-frequency terminal block, damages the device and the transducer.

You can use these diagrams to identify the connection points for your transducer wires on the GSD 26 terminal block. Locate your CHIRP/spread spectrum transducer model in the wiring

color tables ([Transducer Wire Color Tables](#)) for more information.

The outer shield wire must connect to one of the two screw posts below the terminal block using the included ring crimp terminal. When connecting two single-element transducers, you must connect the second transducer to the duplicate set of connections on the right side of the terminal block.

**TIP:** The primary transducer cable wire housing covers the wiring bundles. To identify the wiring groups in the bundles more easily, you can remove up to an inch of the cable housing.

### Single-Element CHIRP/Spread Spectrum

### Dual-Element CHIRP/Spread Spectrum with Temperature and XID

**NOTE:** The temperature and XID wires can be connected at either location.

### Dual-Element CHIRP/Spread Spectrum with XID

**NOTE:** The XID wires can be connected at either location.

### Dual-Element CHIRP/Spread Spectrum with Separate Temperature Sensor

**NOTE:** The temperature and XID wires can be connected at either location.
