Robeck, Randall R. Wallace, 2017-11-06 The need to know why as well as how children and youth respond as they do to

reading instruction has guided the selection of this book's content. The second edition of this title, originally published in 1990, has retained and elaborated upon the three major themes previously presented: that reading is a linguistic process; that motivation in the affective domain may be as important in learning to read as the cognitive domain; and that the reality of learning theory is to be found in the mechanisms of the brain where information is mediated and memory traces are stored. The text integrates views from cognitive psychology, psycholinguistics, and neuropsychology as they relate to reading and writing. A learning motivation model is provided to present associative learning, conceptualization, and self-directed reading in a hierarchical relationship with distinct cognitive and affective components. The distinction between beginning and proficient reading is maintained throughout the text. Handbook of College Reading and Study Strategy Research Rona F. Flippo, Thomas W. Bean, 2018-06-12

The most comprehensive and up-to-date source available for college reading and study strategy practitioners and administrators. In this thorough and systematic examination of theory, research, and practice, the Handbook offers information to help college reading teachers to make better instructional decisions, justification for programmatic implementations for administrators, and a complete compendium of both theory and practice to better prepare graduate students to understand the parameters and issues of this field. The Handbook is an essential resource for professionals, researchers, and students as they continue to study, research, learn, and share more about college reading and study strategies. Addressing current and emerging theories of knowledge, subjects, and trends impacting the field, the Third Edition features new topics such as disciplinary literacy, social media, and gaming theory. Handbook of Self-Regulation of Learning and Performance Dale H. Schunk, Barry Zimmerman, 2011-05-15. Self-regulated learning or self-regulation refers to the process whereby learners personally activate and sustain cognitions, affects, and behaviours that are systematically oriented toward the attainment of learning goals. This is the first volume to integrate into a single volume all aspects of the field of self-regulation of learning and performance: basic domains, applications to content areas, instructional issues, methodological issues, and individual differences. It draws on research from such diverse areas as cognitive, educational, clinical, social, and organizational psychology. Distinguishing features include: Chapter Structure: To ensure uniformity and coherence across chapters, each chapter author addresses the theoretical ideas underlying their topic, research evidence bearing on these ideas, future research directions, and implications for educational practice. International: Because research on self-regulation is increasingly global, a significant number of international contributors are included (see table of contents). Readable: In order to make the book accessible to students, chapters have been carefully edited for clarity, conciseness, and organizational consistency. Expertise: All chapters are written by leading researchers from around the world who are highly regarded experts on their particular topics and are active contributors to the field. *Handbook of Research on Special Education Teacher*
