

The background of the slide features a collection of laboratory glassware, including test tubes and beakers, arranged in a rack. The liquids inside the glassware are in shades of red, orange, and yellow. The lighting is dramatic, with a strong light source from the top left creating a bright glow and casting shadows. The overall aesthetic is scientific and professional.

Gonsalves, Anna T. Danielsson, 2020-04-24 This Edited Volume engages with concepts of gender and identity as they are mobilized in research to understand the experiences of learners teachers and practitioners of physics The focus of this collection is on extending theoretical understandings of identity as a means to explore the construction of gender in physics education research This collection expands an understanding of gendered participation in physics from a binary gender deficit model to a more complex understanding of gender as performative and intersectional with other social locations e g race class LGBT status ability etc This volume contributes to a growing scholarship using sociocultural frameworks to understand learning and participation in physics and that seeks to challenge dominant understandings of who does physics and what counts as physics competence Studying gender in physics education research from a perspective of identity and identity construction allows us to understand participation in physics cultures in new ways We are able to see how identities shape and are shaped by inclusion and exclusion in physics practices discourses that dominate physics cultures and actions

that maintain or challenge structures of dominance and subordination in physics education The chapters offered in this book focus on understanding identity and its usefulness in various contexts with various learner or practitioner populations This scholarship collectively presents us with a broad picture of the complexity inherent in doing physics and doing gender

*Science Teaching in Schools* Great Britain: Parliament: House of Lords: Science and Technology Committee,2006-11-05 The Committee s report examines science and mathematics teaching in secondary schools in England focusing on the following issues the take up of science and mathematics at GCSE and A level the provision of careers advice to students problems in the recruitment and retention of teachers the quality of teaching methods and the role of continuing professional development The Committee finds that effective science teaching in schools is essential both in order to ensure a satisfactory general level of scientific literacy in society and to enable the next generation of scientists and engineers to progress into higher education and beyond It argues that the current examination system forces students to study an excessively narrow range of subjects at too early an age and it recommends that the Government should reconsider the Tomlinson proposals for a broader diploma based system for 14 19 year old students based on the International Baccalaureate This would ensure that students receive a more rounded education and are not made to over specialise before they are able to see the merits of studying science and mathematics Concerns are also raised about the shortage of science teachers particularly specialist physics and chemistry teachers the quality of careers advice in schools and the importance of practical science in schools

**Critical Readings on Piaget** Leslie Smith,2002-09-26 Critical Readings on Piaget is a follow up to Piaget Critical Assessments a collection of eighty three papers dealing with the critique of Piaget s work in psychology education and

philosophy during the period 1950-90. This new collection tracks developments in the most recent published work during the period 1990-95 with an integral guide and editorial commentary by Leslie Smith. Starting with Piaget's epistemology, a major intellectual resource in departmental psychology and education, Leslie Smith sets out the main elements of Piaget's position in relation to twenty-one papers dealing with equilibration and equilibrium, education and social development, reasoning development, number development and modal knowledge. A conclusion examines the psychological and educational assessment of Piaget's epistemology. This collection of distinctive studies during the last five years provides high-profile and engaging examples from current research in this area. It will provide a useful and compact text for undergraduate and postgraduate students and researchers.
