Jean De Lamarck:

(Jean-Baptiste De) Lamarck the Founder of Evolution Alpheus Spring Packard, Jean Baptiste de Lamarck, 1901

Lamarck's Open Mind Jean Baptiste Pierre Antoine de Monet de Lamarck, 2004 This collection of Jean Baptiste Lamarck's lectures provides a wealth of information about the man and his theories Arguing that Lamarck's ideas about evolution initially discredited are increasingly shown to have been prescient and important this study contends that though many of Lamarck's insights may have been flawed his basic contention that environment and evolution are inexorably linked is invaluable particularly in the era of the genome project At a time when Lamarckian notions of a vital universe are replacing mechanistic views this work provides an excellent summation of his ideas and of their increased importance The Literary and Cultural Reception of Charles Darwin in Europe Thomas F. Glick, Elinor Shaffer, 2014-05-22 Beyond his pivotal place in the history of scientific thought Charles Darwin's writings and his theory of evolution by natural selection have also had a profound impact on art and culture and continue to do so to this day The Literary and Cultural Reception of Charles Darwin in Europe is a comprehensive survey of this enduring cultural impact throughout the continent With chapters written by leading international scholars that explore how literary writers and popular culture responded to Darwin's thought the book also includes an extensive timeline of his cultural reception in Europe and bibliographies of major translations in each country **Dreamers, Visionaries, and Revolutionaries in the Life Sciences** Oren Harman, Michael R.

Dietrich, 2018-07-20 What are the conditions that foster true novelty and allow visionaries to set their eyes on unknown horizons What have been the challenges that have spawned new innovations and how have they shaped modern biology In *Dreamers Visionaries and Revolutionaries in the Life Sciences* editors Oren Harman and Michael R Dietrich explore these questions through the lives of eighteen exemplary biologists who had grand and often radical ideas that went far beyond the run of the mill science of their peers From the Frenchman Jean Baptiste Lamarck who coined the word biology in the early nineteenth century to the American James Lovelock for whom the Earth is a living breathing organism these dreamers innovated in ways that forced their contemporaries to reexamine comfortable truths With this collection readers will follow Jane Goodall into the hidden world of apes in African jungles and Francis Crick as he attacks the problem of consciousness Join Mary Lasker on her campaign to conquer cancer and follow geneticist George Church as he dreams of bringing back woolly mammoths and Neanderthals In these lives and the many others featured in these pages we discover visions that were sometimes fantastical quixotic and even threatening and destabilizing but always a challenge to the status quo Bulletin
