

- 5) Zhuang is trying to decide which major he should choose in college. His older brother notes that Zhuang is always asking questions, so maybe he should become a scientist. If Zhuang asks the same kinds of questions that successful scientists ask, he is probably asking things like
- A) Where will I use this information? Will it help me get ahead in life?
 - B) How does this affect me? Why is it important that I know this?
 - C) Who? What? When? Where? How? Can I get a quote?
 - D) Why? How do you know? Where's your evidence? Is there another explanation?

Answer: D

- 6) Hailie is writing a psychology research paper. She has collected research from the past three decades, which her professor says is fine. What is confusing for Hailie is that her articles say different things. She finally asks you why all of the research has been published if some of it is obviously wrong. You tell her that
- A) scientists rarely work together or review previous research, which can leave publications in disagreement with each other.
 - B) truth and reality are in the eye of the beholder.
 - C) part of the scientific process is testing and retesting a theory, to see if everyone reaches the same results each time; if they don't, the research may not agree.
 - D) there is no review process in scientific publication; if someone writes well enough, the article will be published, regardless of its validity.

Answer: C

- 7) Kathy is uncomfortable with some of the things she's learning in her science classes, and she becomes convinced that many scientists are just buying in to the theories they've been taught and perpetuating inaccurate information in their own research. In reality,
- A) she's right. We have no idea how much of the information we rely on as fact is accurate.
 - B) theories are modified only if someone with a great deal of research experience suggests they should be.
 - C) theories are tested, modified, and then tested again by additional research; if they're inaccurate, they're discarded.
 - D) she's right. At least 75 percent of the information published in journals is believed to be inaccurate.

Answer: C

- 8) Thea is taking a social psychology class and is asked to come up with a hypothesis. She decides to see if opposites do in fact attract. On campus the next day, she notices how many people in couples seem to be opposites. When Thea arrives in class with her hypothesis, she mentions it to Melaina, who sits next to her. Melaina is surprised. She says, "My roommate suggested I see if 'birds of a feather' really 'flock together,' and they sure seemed to!" Both Melaina and Thea have found evidence for their hypotheses. What principle is affecting the reasoning of each?
- A) Hindsight
 - B) Diffusion of responsibility
 - C) Theory of social impact
 - D) Bystander apathy

Answer: A
