**In Detail**

Microsoft Dynamics 365 for Finance and Operations has a lot to offer developers. It allows them to customize and tailor their implementations to meet their organization's needs. This Development Cookbook will help you manage your company or customer ERP information and operations efficiently. We start off by exploring the concept of data manipulation in Dynamics 365 for Operations. This will also help you build scripts to assist data migration and show you how to organize data in forms. You will learn how to create custom lookups using Application Object Tree forms and generate them dynamically. We will also show you how you can enhance your application by using advanced form controls and integrate your system with other external systems. We will help you script and enhance your user interface using UI elements. This book will help you look at application development from a business process perspective and develop enhanced ERP solutions by learning and implementing the best practices and techniques.

**Style and approach**

The book follows a practical recipe based approach focusing on real world scenarios and giving you all the information you need to build a strong Dynamics 365 for Finance and Operations implementation.

**Microsoft Dynamics AX 2012 Reporting Cookbook**

Kamalakaran Elangovan, 2013-09-24

Microsoft Dynamics AX 2012 Reporting Cookbook is full of practical recipes for creating and managing reports as well as identifying the most appropriate reporting tool for any reporting challenge. In addition, you will learn about universal topics such as how to locate data for any given report. Although some of the reporting tools addressed in this book are exclusive to Dynamics AX 2012, many of the topics discussed also apply to older versions of AX. This book is packed with illustrations and real time examples that are presented in a task oriented Cookbook structure. Real time tips and tricks make the book very interactive and informative at the same time. Microsoft Dynamics AX 2012 Reporting Cookbook is recommended for Dynamics AX developers and NET based SSRS developers looking to familiarize themselves with the AX reporting framework. A basic understanding of Morphx and X is assumed, but the step by step instructions make it easy even for a beginner. Some examples use C and VB.NET, so experience with Visual Studio is a plus but not a must.
