identify two competing definitions of resistance In marketing resistance denotes a reluctance to adopt a worthy new product or one that offers a clear benefit and carries little or no risk In the field of organizational behavior employees are defined as resistant if they are unwilling to implement changes regardless of the reasons behind their reluctance Seeking to clarify the act of rejecting a new product from the reasons rational or not consumers may have for doing so Oreg and Goldenberg propose a more coherent definition of resistance less encumbered by subjective context specific factors and personality traits The application of this tighter definition makes it possible to disentangle resistance from its sources and ultimately offers a richer understanding of consumers underlying motivations This important research is made clear through the use of many real life examples
