

Practice Test for Unit 3: Ch. 3, and some of 15 and 16: Kinetic Theory of Matter, States of matter, and energy and thermodynamics, and gas laws.

1. The Kinetic Theory of Matter states that all matter is composed of atoms and molecules that are in a constant state of constant random motion.
2. What is Brownian motion, and why does it happen in terms of kinetic theory?
Small pieces of matter in a fluid – flecks of dust, pieces of pollen, smoke particles, etc. – seem to vibrate randomly because they are being constantly hit from all sides by the molecules of the fluid (water, air, etc.)
3. What is thermal expansion, and why does it happen in terms of kinetic theory?
Thermal expansion is the property of most matter that matter expands as heated and contracts as cooled. All matter is in a constant state of motion, the faster they move, the more space they need to move in and push the other molecules away. Thus as solids and liquids (phases of matter with definite volumes) increase temperature, the molecules move more and take up more space, so the substance increases in size.
4. What is diffusion, and why does it happen in terms of kinetic theory?
The quality of matter that substances in materials where atoms are free to flow (gases or liquids), small particles put into the fluid tend to spread out randomly until they are evenly mixed (go from areas of high concentration to low concentration). This happens because both the fluid and the particles are constantly moving, so will be pushed and dragged around by other molecules until they mix evenly.
5. According to the Kinetic Theory what does temperature measure? (don't say "heat")
The average kinetic energy of the atoms and molecules of a substance
6. How does a thermometer work?
When the molecules of the fluid change temperature, say upwards, they move more, this causes them to take up more space (thermal expansion). The fluid in the thermometer has nowhere else to go, so it rises up the tube. The reverse is true for falling temperatures
7. Why can nothing be cooled to below absolute zero?
At absolute zero all molecular motion stops. Since temperature is the average kinetic energy of the atoms and molecules, if there is no motion, there is no kinetic energy. Something can't move at a slower speed than stopped.
8. How does the freezing point of a substance compare to the melting point of the same substance in the same atmospheric conditions? Why is that?
The freezing point and melting point are the same. They are both changing between a solid and a liquid, so it's the same phase change in reverse. The temperature when the atoms have enough energy such that any added energy will just make them flow past each other (melting) must be the same as the temperature the just flowing liquid would need to such that any removed energy would just lock the atoms in place rather than change their temperature (freezing)

FAQs About Gas Laws Thermodynamics And Kinetics Practice Test Books

What is a Gas Laws Thermodynamics And Kinetics Practice Test PDF? A PDF (Portable Document Format) is a file format developed by Adobe that preserves the layout and formatting of a document, regardless of the software, hardware, or operating system used to view or print it. **How do I create a Gas Laws Thermodynamics And Kinetics Practice Test PDF?** There are several ways to create a PDF: Use software like Adobe Acrobat, Microsoft Word, or Google Docs, which often have built-in PDF creation tools. Print to PDF: Many applications and operating systems have a "Print to PDF" option that

allows you to save a document as a PDF file instead of printing it on paper. Online converters: There are various online tools that can convert different file types to PDF. **How do I edit a Gas Laws Thermodynamics And Kinetics Practice Test PDF?** Editing a PDF can be done with software like Adobe Acrobat, which allows direct editing of text, images, and other elements within the PDF. Some free tools, like PDFescape or Smallpdf, also offer basic editing capabilities. **How do I convert a Gas Laws Thermodynamics And Kinetics Practice Test PDF to another file format?** There are multiple ways to convert a PDF to another format: Use online converters like Smallpdf, Zamzar, or Adobe Acrobats export feature to convert PDFs to formats like Word, Excel, JPEG, etc. Software like Adobe Acrobat, Microsoft Word, or other PDF editors may have options to export or save PDFs in different formats. **How do I password-protect a Gas Laws Thermodynamics And Kinetics Practice Test PDF?** Most PDF editing software allows you to add password protection. In Adobe Acrobat, for instance, you can go to "File" -> "Properties" -> "Security" to set a password to restrict access or editing capabilities. Are there any free alternatives to Adobe Acrobat for working with PDFs? Yes, there are many free alternatives for working with PDFs, such as: LibreOffice: Offers PDF editing features. PDFsam: Allows splitting, merging, and editing PDFs. Foxit Reader: Provides basic PDF viewing and editing capabilities. How do I compress a PDF file? You can use online tools like Smallpdf, ILovePDF, or desktop software like Adobe Acrobat to compress PDF files without significant quality loss. Compression reduces the file size, making it easier to share and download. Can I fill out forms in a PDF file? Yes, most PDF viewers/editors like Adobe Acrobat, Preview (on Mac), or various online tools allow you to fill out forms in PDF files by selecting text fields and entering information. Are there any restrictions when working with PDFs? Some PDFs might have restrictions set by their creator, such as password protection, editing restrictions, or print restrictions. Breaking these restrictions might require specific software or tools, which may or may not be legal depending on the circumstances and local laws.
