

Jean Piaget's Theorist Research Paper

Piaget was born in Switzerland August 9, 1896; was a Swiss developmental psychologist and philosopher known for his epistemological studies with children. His theory of cognitive development and epistemological view are together called "genetic epistemology". Wikipedia He received his Ph.

D. in Zoology from the University of Neuchatel 1918 Also the University of Zurich, Piaget study children as well as learning different things by observing his own 3 kids Jacqueline, Laurent, Lucienne Piaget He had already started his career for himself at the very young age of 11. While working he became intrigued with the reasons children gave for their wrong answers on the questions that required logical thinking. Piaget's Fulfilling Career Jean Piaget was the first theorist to study children in a scientific way; he focused on how the kids learned His work has been labeled an interactionist as well as a constructivist.

His interest in cognitive development came from his training in the natural sciences and his interest in epistemology. He saw cognitive growth as an extension of biological growth and as being governed by the same laws and principles. He argued that intellectual development controlled every other aspect of development - emotional, social, and moral. John was employed at the Binet Institute in the 1920's, he was the developer of the French Versions questions for English intelligence test, this is what made him become more intrigued with why kids gave the wrong answers to such easy questions.

This led him to deeper thoughts that children and adults comprehending were totally different than most realized. Piaget being the first psychologist to make systematic experiment with the cognitive development is how people started realizing the different stages. In Piaget's mind, the cognitive development was a progressive reorganization of mental process as a result of biological maturation and environmental experience. In lament terms basically that as a child begins to grow and discover new surroundings their basically being able to teach themselves and ination is like their biggest thing or assumption this is why kids end up giving the wrong answers when asked a simple question, make a common mistake as to identify an object wrong even though they have seen it a million times, I will further explain this topic throughout Piaget Theory Piaget's Theory Piaget has four stages of development.

Which are you may ask? Sensorimotor Stage 0-2, consist of child being able to interact with the environment Preoperational Stage 2-6 or 7, consist of child being able to represent the world symbolically Concrete stage 7-11 or 12; consist of child being able to concentration rules Formal stage 12- adulthood, the adolescent can transcend the concrete situation and starts to think about the future Well according to Piaget children were born with a very basic mental structure (genetically inherited and evolved) each child goes thr
