Neuroscience and the Soul Thomas M. Crisp, Steven Porter, Gregg A. Ten Elshof, 2016-11-20 An interdisciplinary look at arguments both for and against traditional belief in the soul It is a widely held belief that human beings are both body and soul that our immaterial soul is distinct from our material body But that traditional idea has been seriously questioned by much recent research in the brain sciences In *Neuroscience and the Soul* fourteen distinguished scholars grapple with current debates about the existence and nature of the soul Featuring a dialogical format the book presents state of the art work by leading philosophers and theologians some arguing for the existence of the soul others arguing against it and then puts those scholars into conversation with critics of their views Bringing philosophy theology and science together in this way brings to light new perspectives and advances the ongoing debate over body and soul CONTRIBUTORS Robin Collins John W Cooper Kevin Corcoran Stewart Goetz William Hasker Veli Matti K rkk inen Eric LaRock Brian Lugioyo J P Moreland Timothy O Connor Jason D Runyan Kevin Sharpe Daniel Speak Richard Swinburne So Long as They Die, 2006
