Down, but Not Out Dipak Sarmah, IFS (Retd.), 2022-03-19 Blessed with extensive tracts of natural forest harboring the sandal tree *Santalum album* L the Indian state of Karnataka was a leading producer of sandalwood the most valuable product of the tropical forest However due to rampant smuggling during the last three four decades Karnataka s sandalwood production slipped to abysmally low levels with hardly any mature sandal tree being left in the forests What however is providential about the sandal is its resilience to fight for survival in the face of hostile situations Because of this resilience sandal has been able not only to survive in areas where it occurred naturally but also to surface in areas where it was not known to have existed in the past This extraordinary ability of sandal to survive adjust and propagate against heavy odds provides a beacon of hope that it is still possible to restore the lost glory of sandal in Karnataka s forests The book *Down but*

Not Out Sandal in Karnataka attempts at sharing some information about the extensive sandal bearing forests that existed throughout the length and breadth of Karnataka and how they responded to management interventions during the past two hundred years It also dwells upon the challenges associated with the management of sandal in the context of its rapidly dwindling population and suggests ways and means to re establish and replenish its depleted stock ensuring that the new crop of sandal does not face the same fate as the old crop did in the past

Chitaley,V. B. Bakhale,1979 **Changing Land Uses - Shrinking Streams and Carbon Sinks** Brij Kishore Singh,2022-10-19 The book Changing Land Uses Shrinking Streams and Carbon Sinks attempts at providing an overview of the calamitous consequences of deforestation on the world climate Deforestation worldwide has been lowering the carbon sequestration potential of forests and increasing the concentration of CO₂ in the atmosphere The planet is already warmer by 1 10 C than the preindustrial era and as a result we are facing disastrous consequences in terms of frequent and destructive climatic catastrophes namely storms sea surges floods droughts etc Several perennial streams have become seasonal owing to deforestation in the catchments With special reference to Karnataka s Western Ghat forests the book carries several investigative stories highlighting how notified and un notified forests have been plundered for a variety of reasons Diverse land tenures in Kodagu district of Karnataka and administration s failure to regulate the rights and privileges are exploited by the nexus between politicians and bureaucrats Without realizing the ecological services provided by forests natural forests in different land tenures have been allowed to be degraded for quid pro quo In addition forests have been diverted for many developmental projects such as widening of roads construction of reservoirs for power and irrigation transmission of power establishing rail connectivity etc leading to changing land uses disappearance of perennial streams and loss of carbon sinks It is high time that states acted in conserving natural forests irrespective of the ownership and the country as a whole must grow trees over 26 million hectares of degraded land by 2030 as pledged in the Paris climate accord of 2015
