Phoenicia Dinah Baloyi, 2014 Absenteeism Nursing student College Afwesigheid Verpleegkundestudent Kollege Working with indigenous knowledge Fhumulani M. Mulaudzi, Rachel T. Lebese, 2022 The aim of the book is to assist both local and international scholars in articulating the scholarly discourse on indigenous health attitudes practices and experiences The indigenous lens that was used to generate and disseminate indigenous knowledge in this book will strengthen indigenous scholarship thus making it accessible to a wider audience In addition the information shared in this book will add value for scholars and assist them with the indigenous knowledge needed to address sustainable development goals This book is timeous and topical as the discourse on the decolonisation of the curriculum is widely debated in the higher education space The discourse on the scholarship of indigenous knowledge as the tacit local knowledge that stems from cultural practices within communities has not been well articulated in the current health science education milieu Indigenous knowledge has remained overlooked and undermined for a very long time and the information remains untapped in local communities The scholars who conducted the research on which this book is based unearthed a wealth of knowledge which was tacit in nature and translated it into implicit knowledge that can be documented and shared with other scholars globally This knowledge will

assist health care scholars in benefiting from knowledge practices and cultural beliefs that will assist them in health care planning teaching evidence based practice and further research **Global Health Security** ,2024-06-19 The current book **Global Health Security Contemporary Considerations and Developments** represents a collective work of multiple authors from around the world with an ultimate goal of providing the reader with a comprehensive exploration of critical issues shaping modern global health security especially in the post COVID 19 reality of today It not only highlights the latest trends challenges and advancements shaping the field but also delves into unique topics like the impact of geopolitical tensions and barriers funding gaps intentional and unintentional misuse of social media platforms medical and health misinformation and the need for greater equity and inclusivity Moreover the book outlines potential future directions for strengthening global health security including the enhancement of multisectoral collaboration investment in research and development and promotion of health equity These are critical measures that can help address the current challenges facing our planet following the most devastating pandemic in over a century This collection of expert manuscripts provides valuable insights and practical recommendations that can help inform policy decisions and guide future research and development efforts We hope that the reader will find this book to be an essential resource especially for those looking to gain a deeper

Mgutshini,2022-04-30 The introduction of ECPs in South African Universities is seen by many as South Africa s key strategy for addressing the problem of poor patterns of student success and has its basis on the uncontested acceptance that an extended study duration may be necessary to bring some categories of learners to a level of parity with the readiness expectations of their course of study Even so this transformative strategic imperative has been plagued by a range of challenges that include poor systems readiness poor selection mechanisms in the identification of ECP students poor numeracy and literacy amongst students and indifferent teacher involvement in ECPs This volume offers a rare insight into many of the above recognised challenges and in so doing provides critical matter for thought for educators within the higher
