with the introduction of the newly developed EPSON Color Software Engine, users of the EPSON PERFECTION (V-Pe200) benefit from a huge performance boost. These new features also act as smart image applications by reducing three elements over modern Full-Color mode: image noise and Production mode – EPSON Color mode has dynamically changed to reflect the extremely low requirements of all users, from casual to professional. Some of the new features in the professional mode are Multi-passes, histograms, Multiple tone (primary tones) and Multiple tone Chromatizing. It is a great software that enables users to scan color images with maximum quality.

Joining the ranks (BPO) of cost-cutters are Citicorp Automation and Quest Software. Designed specifically for high quality control and file copying, Citicorp Automation employs sophisticated technology to substantially reduce image quality that has been subjected to "fading" and other color loss influences, such as old age and physical surroundings. With the Quest Personal Desktop, BPO's User automatically detects loss on film or documents, and then adjusts for necessary adjustments.

As a result of its newly designed interface, the SPSS® Smart Model software represents a perfect learning/teaching piece and one of us (Savaris) has, in fact, only made page 100 (see, <http://www.spss.com>) recently (Savaris, 2003).
