ESSKA Instructional Course Lecture Book Roland Becker, Gino M.M.J. Kerkhoffs, Pablo E. Gelber, Matteo Denti, Romain Seil, 2016-04-14 This book comprising the Instructional Course Lectures delivered at the 17th ESSKA Congress in Barcelona in 2016 provides an excellent update on current scientific and clinical knowledge in the field of Orthopaedics and Sports Traumatology. A variety of interesting and controversial topics relating to the shoulder, elbow, hip, knee and foot are addressed, all of which are very relevant to the daily practice of orthopaedic surgeons. The coverage includes a number of open questions such as: How should complications be handled during rotator cuff surgery? What errors may occur during anterior cruciate ligament surgery? How much attention must be paid to meniscal root tears? Do we now understand the pathology of osteoarthritis sufficiently well and do we always identify the most successful treatment for our patients? All of the contributions are written by well-known experts from across the world. The presentations will enable the reader to gain a better understanding of pathologies and may permit more individualized treatment of patients. The book will be of interest to clinicians and researchers alike.

ACL Injuries in the Female Athlete Frank R. Noyes, Sue Barber-Westin, 2018-09-07 This successful book, now in a revised and updated second edition, reviews all aspects of anterior cruciate ligament ACL injuries in female athletes, with the focus on complete noncontact ACL injuries. The opening section discusses anatomy and biomechanics and explains the short and long term impacts of complete ACL ruptures, including long term muscle dysfunction and joint arthritis. Risk factors and possible causes of the higher noncontact ACL injury rates in female athletes compared with male athletes are then discussed in depth. Detailed attention is devoted to neuromuscular training programs and their effectiveness in reducing noncontact ACL injury rates in female athletes, as well as to sports specific ACL injury prevention and conditioning programs of proven value. Rehabilitation programs after ACL injury and reconstruction that reduce the risk of a future injury are explored, and the concluding section looks at worldwide implementation of neuromuscular ACL injury prevention training and future research directions. The book will be of value to orthopedic surgeons, physical therapists, athletic trainers, sports medicine primary care physicians, and strength and conditioning specialists.
