born digital film archives are now becoming important resources for digital scholarship as a consequence of digitization. Moreover, with advancements in digital research methods involving video annotation, visual analysis, and GIS affecting the way we look at archival films, material stylistic histories, and circulation, new research practices are more important than ever. *Visualizing Film History* is an accessible introduction to archive-based digital scholarship in film and media studies and beyond. With a combined focus on the history of film historiography, archiving, and recent digital scholarship covering a period from the first wave of film archiving in the early 1900s to recent data art, this book proposes ways to work critically with digitized archives and research methods. Christian Olesen encourages a shift towards new critical practices in the field with an in-depth assessment of and critical approach to doing film historiography with the latest digital tools and digitized archives. Olesen argues that if students, scholars, and archivists are to fully realize the potential of emerging digital tools and methodologies, they must critically consider the roles that data analysis, visualization interfaces, and procedural human machinery interactions play in producing knowledge in current film historical research. If we fail to do so, we risk losing our ability to critically navigate and renew contemporary research practices and evaluate the results of digital scholarship.

The Routledge Companion to History and the Moving Image Marnie Hughes-Warrington, Kim Nelson, Mia E.M. Treacey, 2023-11-07. *The Routledge Companion to History and the Moving Image* takes an interdisciplinary approach to understanding history in moving images. It engages this popular and dynamic field that has evolved rapidly from film and television to digital streaming into the age of user-created content. The volume addresses moving image history through a theoretical lens, modes and genres, representation, race and identity, and evolving forms and formats. It brings together a range of scholars from across the globe who specialize in film and media studies, cultural studies, history, philosophy of history, and education. Together, the chapters provide a necessary contemporary analysis that covers new developments and questions that arise from the shift to digital screen culture. The book examines technological and ethical concerns stemming from today's media landscape but it also considers the artificial construction of the boundaries between professional expertise and amateur production. Each contributor's unique approach highlights the necessity of engaging with moving images for the academic discipline of history. The collection, written for a global audience, offers accessible discussions of historiography and a compelling resource for advanced undergraduates and postgraduates in history, film, and media studies and communications.
