

Assembly of polypeptide

Completing the polypeptide

bond holding the first tRNA molecule to its amino acids is broken. the tRNA then moves onto a third binding site, from which it exits the ribosome. ribosome then moves to the 3 codon. ribosome stop codon, it releases both the newly formed polypeptide and the mRNA molecule.

13. Describe the role of rRNA during translation. help hold ribosomal proteins in place and locate the beginning of the mRNA message.

The Molecular Basis of Heredity

15. The central dogma of molecular biology is that information is transferred from

A. RNA to protein to DNA. B. DNA to protein to RNA.
C. protein to DNA to RNA. D. DNA to RNA to protein.

16. An exception to the central dogma is

- A. the infection of a virus by a bacteriophage.
B. the ability of some viruses to transfer information from RNA to DNA.
C. the expression of different genes during different stages of development.
D. the translation of the codon into the anticodon of tRNA.
17. The way in which DNA, RNA, and proteins are all involved in putting genetic information into action in living cells is called

17. A. translation. B. transcription. C. gene expression. D. viral transfer.

18. All organisms are mostly the same in

A. the proteins they make on their ribosomes. B. how their proteins catalyze chemical reactions.
C. the size of their genes. D. the molecular biology of their genes.

13.3 Mutations

Lesson Objectives

18. Define mutations and describe the different types of mutations.
19. Describe the effects mutations can have on genes.

20. Lesson Summary

Types of Mutations Mutations are heritable changes in genetic information. There are two categories of mutations: gene mutations and chromosomal mutations.

21. Gene mutations produce changes in a single gene. **Point mutations** involve only one or a few nucleotides. Substitutions, insertions, and deletions are all types of point mutations.

- In a substitution, one base is changed to a different base, which may affect only a single amino acid and have no effect at all.
- In insertions and deletions, one base is inserted or removed from the DNA sequence. Insertions and deletions are called **frameshift mutations** because they shift the “reading frame” of the genetic message. Frameshift mutations can change every amino acid that follows the point of mutation and can have dramatic effects on the organism.

Beurton, Raphael Falk, Hans-Jörg Rheinberger, 2000-05-29 Advances in molecular biological research in the latter half of the twentieth century have made the story of the gene vastly complicated the more we learn about genes the less sure we are of what a gene really is Knowledge about the structure and functioning of genes abounds but the gene has also become curiously intangible This collection of essays renews the question what are genes Philosophers historians and working scientists re evaluate the question in this volume treating the gene as a focal point of interdisciplinary and international research It will be of interest to professionals and students in the philosophy and history of science genetics and molecular biology **Quantitative Aspects of Growth and Metabolism of Microorganisms** A.H. Stouthamer, 2012-12-06 Application of recent advances such as non equilibrium thermodynamics the maintenance concept and the material balancing method to the description of

microbial growth has suggested new experimental approaches which have yielded a wealth of data. These data have been used to develop mathematical models of microbial growth and metabolism and the models have made it possible to direct the metabolism of a microorganism in such a way that more of a certain desired product is made. While a full quantitative description of all aspects of microbial growth and metabolism is still remote, the new approaches are opening up large areas of new potential. It is now possible, for instance, to deal with individual cells in a population and with quantitative aspects of product formation and optimisation. Microbiologists, biochemists and physiologists will find this an invaluable update on a field of great promise.
