NeuroKinetic Therapy David Weinstock, 2012-06-05 NeuroKinetic Therapy is based on the premise that when an injury has occurred certain muscles shut down or become inhibited forcing other muscles to become overworked This compensation pattern can create pain or tightness By applying light pressure that the client then resists the practitioner can evaluate the strength or weakness of each muscle revealing the sources of injury and retraining the client's body to remove the compensation patterns reprogramming the body at the neural level This easy to follow practitioner's manual presents a series of muscle tests specially designed to uncover and resolve compensation patterns in the body Author David Weinstock begins by explaining how this approach stimulates the body and mind to resolve pain Organized anatomically each section of the book includes clear photographs demonstrating correct positioning of the muscle accompanied by concise explanations and instructions Labeled anatomical illustrations appear at the end of each section showing the relationships between the muscles and muscle groups This essential resource is especially useful for physical therapists chiropractors orthopedists and massage therapists looking for new ways to treat underlying causes of pain
