

enVision Math 3.1 - The Distributive Property Practice

Answer Key

Separate the rows in the large array into two smaller arrays. Write the new facts.

$$3 \times 5 = (\underline{\quad} \times \underline{\quad}) + (\underline{\quad} \times \underline{\quad})$$

Sample answer: $(2 \times 5) + (1 \times 5)$

$$4 \times 7 = (\underline{\quad} \times \underline{\quad}) + (\underline{\quad} \times \underline{\quad})$$

Sample answer: $(2 \times 7) + (2 \times 7)$

Use the Distributive Property to find each missing factor. Use counters and arrays to help.

3. $4 \times 8 = (3 \times \underline{8}) + (1 \times 8)$

4. $6 \times 5 = (\underline{4} \times 5) + (2 \times 5)$

5. $(\underline{3} \times 9) = (1 \times 9) + (2 \times \underline{9})$

6. $(0 \times \underline{7}) = (5 \times 7) + (\underline{5} \times 7)$

7. $(5 \times \underline{6}) = (4 \times 6) + (\underline{1} \times 6)$

8. $(8 \times \underline{2}) = (\underline{2} \times 2) + (6 \times 2)$

International Perspectives on Gender and Mathematics Education Olof Steinthorsdottir, Helen J. Forgasz, Joanne Rossi Becker, Kyeonghwa Lee, 2010-06-01 Why a book on gender issues in mathematics in the 21st century Several factors have influenced the undertaking of this project by the editors First an international volume focusing on gender and mathematics has not appeared since publication of papers emerging from the 1996 International Congress on Mathematical Education Keitel 1998 Surely it was time for an updated look at this critical area of mathematics education Second we have had lively discussion and working groups on gender issues at conferences of the International Group for the Psychology of Mathematics Education PME for the past four years sessions at which stimulating and ground breaking research has been discussed by participants from many different countries Some publication seemed essential to share this new knowledge

emerging from a wider variety of countries and from different cultural perspectives Third some western countries such as Australia and the USA have experienced in recent years a focus on the boy problem with an underlying assumption that issues of females and mathematics have been solved and are no longer worthy of interest Thus it seemed timely to look more closely at the issue of gender and mathematics internationally When the idea for this volume first emerged invitations were issued to those regularly attending the working and discussion groups at PME Potential authors were charged to focus on gender issues in mathematics and were given wide scope to hone in on the issues that were central to their own research efforts or were in receipt or in need of close attention in their own national or regional contexts
