

EPIC EMR Software the Ultimate Solution

The ease of use is an important part of making Epic EMR Software the ultimate solution. The system has an intuitive user interface and can be used on all types of devices, including tablets and mobile phones. The system can be extended to independent practices, hospitals, and post-acute care facilities. This flexible, scalable platform enables users to set their databases to different sizes and easily add, remove, or move data from one site to another. Furthermore, the system enables users to customize the data they store in [Epic EMR software](#), making it an ideal choice for organizations that require a large database. One of the best features of Epic is that it can exchange patient charts with other healthcare organizations. This means that you can easily share patient data with other providers. Its Health Information Exchange (HIX) module allows you to share your patients' data with other healthcare providers. Because Epic can exchange more charts than any other vendor, it facilitates communication among community providers, caregivers, and patients. It also offers modules for various specialties and ancillaries, enabling you to easily customize it to fit your practice. The best thing about Epic is its flexibility. You can create specialty modules according to your needs, and there are pre-built content and workflows for almost any specialty. For instance, Epic implemented Care everywhere interoperability before Meaningful Use, and the company has since provided technology to communicate with other EHR solutions, national networks, and government agencies. It even offers a feature called Epic Share Everywhere, which lets you access your patient data without the need for an EHR.
