Teaching Health Science Stephen J. Bender, 1997 Since the last edition of *Teaching Elementary Health Science*, much has changed in health education. This edition contains the most recent information regarding education and health and the National Health Education Standards. Part 1 of this text covers health science foundations including the relationship between education and health, the meaning of comprehensive school health, curricular approaches, learning strategies, and instructional accountability. Part 2 covers content strategies and skills. This text is a beneficial tool for elementary and middle school teachers and students of elementary middle school health education.

Science 2000, *Student Work and Teacher Practices in Science* Christine Y. O'Sullivan, Andrew R. Weiss, 1999 In 1996 the National Assessment of Educational Progress (NAEP) assessed the knowledge and skills of students in the areas of earth science, life science, and physical science. It also collected information related to the background of students, grades 4, 8, and 12, their teachers, grades 4 and 8, and the schools they attended, grades 4, 8, and 12. This report is intended primarily for science teachers; hence the results presented relate directly to student performance, classroom practices, and school climate. This report also discusses students' attitudes and beliefs about science. The report is divided into four parts. In the first part, chapter 1, an overview of the assessment is provided. This includes information about the framework used in the development of the assessment, a description of how the assessment was administered to students, and an explanation of how to interpret NAEP results. In the second part, chapters 2, 3, and 4, examples of questions and student responses are presented. These chapters are divided by grade. The third part, chapters 5 and 6, contains information collected from students, teachers, and school administrators about classroom practices, student motivation, and parental involvement in learning. Finally, the fourth part contains appendices offering a fuller description of the procedures used for the NAEP 1996 science assessment: appendix A, scoring guides for questions discussed in chapters 2, 3, and 4; appendix B, standard errors for the statistics presented in the report; appendix C, WRM.
