the digital woods I knew I wanted to build web apps but didn't know what those people called themselves. Were they website builders? Programmers? The term software engineer floated around a lot online, was that my aspiration? Since I didn't know exactly what I was looking for, I spent a lot of time reading and watching materials that were nothing but discouraging: mock Google coding interviews with whiteboards and markers, lots of articles and videos that name-dropped things like binary trees, Big O notation, and time complexity. Forum post upon forum post that gave away actual coding interview questions from the biggest tech companies in the world like Facebook, Google, and Microsoft. Making things worse, some web developers I had discovered on YouTube were talking about a really good popular book for coding interviews. I checked it out, and once again, my stomach sank. I'm never going to make it in this field, I said to myself. I've been studying and practicing and building projects for months, and I still have no idea what these people are talking about. What they didn't tell me was that the book is geared towards senior software engineers trying to get a job with Amazon and Google. I wanted to quit my coding journey. In fact, I did quit. The difference was I didn't stay quit. Something told me to keep pushing forward, keep building projects to put in my portfolio and GitHub, keep reaching out and trying to find clients who needed websites. I kept pushing until I got a job as a fullstack web developer at a data company. As it turns out, the internet isn't very generous to our career field. Beginners are especially marginalized. There aren't any quality one-stop resources for discovering one of the most important questions, if not the most important question web developers have: How do I get a job in this field? I wanted to change the junior web developer tech landscape with this book. My goal is for every junior developer who reads this to find a job. And if you take the recommended actions in this book, you can do it. *Web Development Career Master Plan* Frank W. Zammetti, 2024-06-07
