

Lab – Getting Pushy (That wasn't my title)

Theoretical: A force is a push or pull. It is the product of mass and acceleration ($F=ma$)

Practical:

1. The purpose of this lab is to investigate the relationship between mass, force, and acceleration.
2. Answer: When an object is moving, does there need to be a force on it? Why or why not? (you already answered that yesterday, just rewrite your answer into your report)

Coordinated Science Laboratory, 1964 **Soft Focus** Jayne Ann Krentz, 2000-10-01 With her hallmark blend of sparkling style and wit intricate suspense and steamy passion Jayne Ann Krentz is truly one of a kind One of today's premier storytellers she has more than twenty three million copies of her novels in print Now the phenomenal New York Times bestselling author spins her latest scintillating tale a story of two people bound together by that most binding of ties a business contract Elizabeth Cabot is all business She knows how to maximize her investments and cut her losses in both her career and her personal life So when she discovers that Jack Fairfax has deceived her she's determined to end their relationship Putting a stop to their budding romance is easy But breaking up their business deal will be more difficult Despite all her efforts she has no luck disentangling herself from Jack's client company Excalibur But the situation becomes even more strained when a new obstacle emerges a lethal act of sabotage that could put both of them out of business for good Elizabeth is no fool If she can help Jack save Excalibur she'll recoup her substantial investment plus millions in profit Putting her emotions aside she insists on helping him search for the scientist who's disappeared with a valuable new crystal that could revolutionize the high tech industry She'll go in solve the problem and get out The trail leads Elizabeth and Jack to a fringe film festival but their goal is as elusive as the shadowy black and white images from classic noir films Life starts to imitate art and double dealing seems to be the name of the game For these business adversaries turned reluctant partners keeping an eye on each other and the lid on a sizzling attraction seems the only insurance against further treachery But with millions at stake trust can turn to betrayal in the blink of an eye **Dry Lab** Gary Blackburn, 2001-11-26 Dry Lab is a rather unconventional mystery novel The setting a biomedical research institute as well as elements of the plot and many of the characters are broadly drawn from my career in science The term dry lab is one chemists use to describe a fraudulent experiment one in which no actual chemistry is done hence the word dry Rather the data are fabricated to achieve the desired result Instances of dry labbing by the murder victim create a second layer of suspense as the hows and whys of his fraud are gradually uncovered The characters include Dr Jack Spivey universally despised virologist and research con man Rob Hastings Spivey's insecure and ethics ridden postdoctoral fellow Wendy Rich travel agent by day animal rights activist and computer hacker by night Eve Dash Spivey's mistress and former call girl and Vince Rubino vending machine supplier and occasional self induced psychopath The action begins with Spivey's murder Hastings is ordered by the Institute Director to put his former boss's scientific house in order and discovers a rich legacy of laboratory larceny As Spivey's academic heir Hastings inherits the dead man's enemies including the animal rights activists implicated in his murder Computer sabotage rodent venereal disease toxic Twinkies and a purloined AIDS drug all figure in the plot along with blackmail murder and romantic intrigue The Science in Dry Lab The science supporting key elements of Dry Lab's plot is both accurate and plausible although of course not always practicable The death of Jack Spivey for example results from administration of a monoamine oxidase inhibitor anti depressant a class of drugs known to cause hypertensive crisis in patients with a history of

high blood pressure This and the later attempted murder of Rob Hastings by induced anaphylactic shock both involve the use of a targeted toxin a substance harmless to anyone without specific susceptibility to its biological effects Spivey's pet project sponsored by Thanopest Inc to drive native rat populations into extinction using a genetically engineered rat virus reminiscent of HIV has a similar basis in real science The effectiveness of the anti AIDS drug Spivey sold to his acquaintance Terry Detweiler is a bit more of a reach but there is precedent for anti cancer drugs acting against viruses like HIV AZT is one such example The science discussed in the brainstorming session between Hastings the Mexican scientist who discovered the drug and Detweiler who is also a scientist is again plausible and internally consistent And finally Rob's rescue during his anaphylactic episode through sexual arousal should also work Under such circumstances a twenty something male would release a sizable burst of adrenaline which would most certainly help counteract the effects of the allergen **Deep**
