Democracy in the Christian Church Luca Badini Confalonieri, 2012-05-10 Are church structures divinely willed and consequently both permanent and irreversible Can Christians modify the polity of their church like they do with that of civil society What would be the role of the office of oversight in a Christian church democratically organized What would its relationship with specialized authorities within the community be Building on a remarkable number of specialist studies in exegesis church history political philosophy canon law and ecclesiology this book convincingly fulfils three goals First it encourages Christians to determine the political outlook of their faith community Secondly it provides some fundamental criteria for judging the ethical value of church structures on the basis of Bernard Lonergan's cognitional theory and with the help of recent insights from contemporary political philosophy Thirdly it outlines a largely novel and groundbreaking understanding of a democratic church In the process it engages with some of the most difficult ecclesiological issues faced by most Christian churches *Cultivating Moral Character and Virtue in Professional Practice* David Carr, 2018-03-05 *Cultivating Moral Character and Virtue in Professional Practice* is a pioneering collection of essays focused on the place of character and virtue in professional practice Professional practices usually have codes of conduct designed to ensure good conduct but while such codes may be necessary and useful they appear far from sufficient since many recent public scandals in professional life seem to have been attributable to failures of personal moral character This book argues that there is a pressing need to devote more attention in professional education to the cultivation or development of such moral qualities as integrity courage self control service and selflessness Featuring contributions from distinguished leaders in the application of virtue ethics to professional practice such as Sarah Banks Ann Gallagher Geoffrey Moore Justin Oakley and Nancy Sherman the volume looks beyond traditional professions to explore the ethical dimensions of a broad range of important professional practices Inspired by a successful international and interdisciplinary conference on the topic the book examines various ways of promoting moral character and virtue in professional life from the general ethical perspective of contemporary neo Aristotelian virtue theory The professional concerns of this work are of global significance and the book will be valuable reading for all working in contemporary professional practices It will be of particular interest to academics practitioners and postgraduate students in the fields of education medicine nursing social work business and commerce and military service
