Sojourning in Disciplinary Cultures Maureen Mathison,2019-04-15 Sojourning in Disciplinary Cultures describes a
multiyear project to develop a writing curriculum within the College of Engineering that satisfied the cultural needs of both
compositionists and engineers at a large R1 university Employing intercultural communication theory and an approach to
interdisciplinary collaboration that involved all parties cross disciplinary colleagues were able to develop useful descriptions
of the process of integrating writing with engineering overcoming conflicts and misunderstandings about the nature of
writing gender bias hard science versus soft science tensions and many other challenges This volume represents the
collective experiences and insights of writing consultants involved in the large scale curriculum reform of the entire College
of Engineering they collaborated closely with faculty members of the various departments and taught writing to engineering
students in engineering classrooms Collaborators developed syllabi that incorporated writing into their courses in meaningful
ways designed lessons to teach various aspects of writing created assignments that integrated engineering and writing
theory and concepts and worked one on one with students to provide revision feedback Though interactions were sometimes
tense the two groups writing and engineering developed a third culture that generally placed students at the center of
learning Sojourning in Disciplinary Cultures provides a guide to successful collaborations with STEM faculty that will be of
