Computer Integrated Manufacturing arose from the joint work of members of the IFIP Working Group 5.3 Discrete Manufacturing and other IFIP members. Within the Technical Committee 5 of the International Federation of Information Processing (IFIP), the aim of this Working Group is the advancement of computers and their application to the field of discrete part manufacturing. Capabilities will be expanded in the general areas of planning, selection and control of manufacturing equipment and systems. Tools for problem solution include mathematics, geometry, algorithms, computer techniques and manufacturing technology. This technology will influence many industries: machine tool, automation, aircraft, appliance and electronics, to name but a few. The Working Group undertook the following specific tasks:

- 1 To maintain liaison with other national and international organizations working in the same field, cooperating with them whenever desirable to further the common goal.
- 2 To be responsible for the IFIP's work in organizing and presenting the PRO LAMAT Conferences.
- 3 To conduct other working conferences and symposia as deemed appropriate in furthering its mission.
- 4 To develop and sponsor research and industrial and social studies into the various aspects of its mission.

The book can be regarded as an attempt to underline the main aspects of technology from the point of view of its software and hardware realization. Because of limitations in size and the availability of literature, the problems of robotics and quality control are not described in detail.

Dacă veți scrie și puneți o a doua problemă: scrieți în command line 20 30 123 23 7 pe același prompter și veți vedea că pe spațiul grafic vi se trasează automat o linie între punctele A 20 30 și B 123 23 7. Manual de NLP Joseph O'Connor, Influența limbajului asupra funcțiilor cognitive, metodele de inducere a unor stări emoționale și tehnicile de influențare a deciziilor celorlalți și acestea sunt doar câteva dintre subiectele abordate de către Joseph O'Connor în urma lecturii acestui volum veți constata că NLP-ul nu reprezintă doar o sumă de tehnici eficiente ci este în un mod original de a te găndi la lumea din jurul tău. NLP-ul a născut prin studierea unor personalități care s-au remarcat în varii domenii de activitate având la bază ideea conform căreia mintea umană este asemenea unui computer iar limbajul nostru verbal și nonverbal reprezintă programele care ne permit să ne schimbăm gândirea și să influențăm alte persoane. De aceste tehnici sunt în general intuite de oricine. NLP-ul ne ajută să le conștientizăm cu adevărat pentru a le putea aplica oriunde și oricând vrem.

O lectură fundamentală și indispensabilă tuturor celor care vor să se inițieze în acest domeniu prolific. O prezentare extraordinară a principiilor fundamentale ale NLP-ului Robert Dilts Tooling, 1982.
