### Starting and Lighting Equipment

**Illustr. 58**  
Generator, battery ignition unit, cables, etc.

#### Description

The electrical system of the tractor is a twelve-volt system and consists of a generator, voltage regulator, cranking motor, sealed-beam lights, lighting switch and a battery ignition unit with a twelve-volt battery (or a magneto, if used). The system is a single-wire type with a ground return to the battery.

The cables are contained in a harness of non-metallic oilproof and waterproof woven braid.

Use the illustrations on pages 58 and 60 and the wiring diagram on pages 62 and 63 as a guide for identifying the various electrical units and for tracing the electrical cables and connections. Be sure all terminals are clean and securely fastened.

When the electrical equipment is installed at the factory, the battery ground cable is disconnected and taped. Before attempting to start the tractor, make certain that the ground cable is connected.
