Enterprise Architectures and Integration Using SOA Amjad Umar, 2010-01 Mobile computing and wireless communications are transforming the way we live conduct business and communicate with each other Instead of concentrating on one aspect of this broad field this comprehensive book covers the management as well as technical aspects of wireless networks the applications that are being built on top of them the platforms used to build these applications and the security architecture and management issues This book is subdivided into three parts The first part concentrates on business and applications and consists of four chapters that cover topics such as mobile business mobile commerce wireless Internet Mobile IP and mobile computing platforms such as WAP I Mode Brew J2ME and Voice XML The second part examines wireless networks with a practical analysis of 802.11 LANs Bluetooth UWB wireless sensor networks cellular networks wireless local loops satellites deep space communications and FSO The last part gives a synthesis by discussing wireless security architectures integration management and support issues Numerous case studies and examples are included to illustrate the key points This classroom tested book is highly suitable for wireless communications courses in IT IS programs Complete instructor manuals are available See the author site [www.amajdumar.com](http://www.amajdumar.com) for more details SOA Source Book The Open Group, 2020-06-11 Software services are established as a programming concept but their impact on the overall architecture of enterprise IT and business operations is not well understood This has led to problems in deploying SOA and some disillusionment The SOA Source Book adds to this a collection of reference material for SOA It is an invaluable resource for enterprise architects working with SOA The SOA Source Book will help enterprise architects to use SOA effectively It explains What SOA is How to evaluate SOA features in business terms How to model SOA How to use The Open Group Architecture Framework TOGAF for SOA SOA governance This book explains how TOGAF can help to make an Enterprise Architecture Enterprise Architecture is an approach that can help management to understand this growing complexity **Integrating SOA and Web Services** N. Sudha Bhuvaneshwari, S. Sujatha, 2011-06-30 This book highlights how to integrate and realize Service Oriented Architecture with web services which is one of the emerging technologies in IT It also focuses on the latest technologies such as Metadata Management Security issues Quality of Service and its commercialization A chapter is also devoted to the study of Emerging standards and development tools for Enterprise Application Integration Most enterprises have made extensive investments in system resources over the course of many years Such enterprises have an enormous amount of data stored in legacy enterprise information systems EIS so it is not practical to discard existing systems It is more cost effective to evolve and enhance EIS This could be done with the help of SOA realizing with web services which is an emerging field in Information technology SOA is usually realized through web services Web services specifications may add to the confusion of how to best to utilize SOA to solve business problems In order for a smooth transition to SOA using an architectural style that helps in realizing web services through SOA The book

concentrates on this architecture realization and integration of SOA with web services It consists of 12 chapters and is recommended for all postgraduate Computer Science Students

Enterprise Service Oriented Architectures James McGovern,Oliver Sims,Ashish Jain,Mark Little,2006-07-10 Conventional wisdom of the software stack approach to building applications may no longer be relevant Enterprises are pursuing new ways of organizing systems and processes to become service oriented and event driven Leveraging existing infrastructural investments is a critical aspect to the success of companies both large and small Enterprises have to adapt their systems to support frequent technological changes mergers and acquisitions Furthermore in a growing global market these systems are being called upon to be used by external business partners Technology is often difficult costly and complex and without modern approaches can prevent the enterprise from becoming agile Enterprise Service Oriented Architectures helps readers solve this challenge in making different applications communicate in a loosely

coupled manner This classic handbook leverages the experiences of thought leaders functioning in multiple industry verticals and provides a wealth of knowledge for creating the agile enterprise In this book you will learn How to balance the delivery of immediate business value while creating long term strategic capability Fundamental principles of a service oriented architecture find bind and execute The four aspects of SOA Production Consumption Management and Provisioning How to recognize critical success factors to implementing enterprise SOAs Architectural importance of service registries interfaces and contracts Why improper service decomposition can hurt you later rather than sooner How application design and integration practices change as architects seek to implement the agile enterprise About the Authors James McGovern is an enterprise architect for The Hartford He is an industry thought leader and co author of the bestselling book A Practical Guide to Enterprise Architecture Oliver Sims is a recognized leader in the architecture design and implementation of service oriented and component based enterprise systems He was a founding member of the OMG Architecture Board He was co author of the groundbreaking book Business Component Factory Ashish Jain is a Principal Architect with Ping Identity Corporation a leading provider of solutions for identity federation Prior to joining Ping Identity he worked with BEA Systems where his role was to assist BEA customers in designing and implementing their e business strategies using solutions based on J2EE He holds several industry certifications from SUN and BEA and is also a board member for the Denver BEA User group Mark Little is Director of Standards and SOA Manager for JBoss Inc Prior to this he was Chief Architect for Arjuna Technologies Ltd and a Distinguished Engineer at Hewlett Packard As well as being an active member of the OMG JCP OASIS and W3C he is an author on many SOA and Web Services standards He also led the development of the world's first standards compliant Web Services Transaction product
