Jacobs, 2017-10-24 The diverse composition of American families and changing ways of raising our children have become subjects of intense scrutiny by researchers and policymakers in recent years Shifting demographics and work patterns growing numbers of women in the work force teenage pregnancy single parent families and the deinstitutionalization of the elderly disabled and mentally ill all these trends have significantly affected family life Evaluating Family Programs effectively bridges the gap between researchers and practitioners in order to bring practical understandable advice to providers of family programs and to program funders and policymakers Heather B Weiss and Francine H Jacobs have collected in this volume works which move outside the traditional approaches of their disciplines to create new models for delivering and evaluating services This sets a mood of genuine inquiry and excitement about successful aspects of programs while maintaining openness about the limitations of both research and practice By expanding the research model this work is an attempt to understand reciprocal influences of extended family culture community and social institutions It urges those who advocate program accountability to understand that not all types of evaluations are appropriate for all programs and it notes that limitations in current evaluation technologies make it difficult to evaluate outcomes Evaluating Family Programs reminds the reader that in order to develop sound family policy we must look at children and families in context Beacuse policymakers program administrators and informed citizens have come to rely more upon the results of evaluation research we must improve our methods while not losing sight of its limitations It is a thought provoking contribution to the efforts of those who seek to support the American family with compassion understanding and realism *Putting Analysis Into Child and Family Assessment, Third Edition* Ruth Dalzell, Emma

Grading the Nation's Report Card National Research Council, Commission on Behavioral and Social Sciences and Education, Board on Testing and Assessment, Committee on the Evaluation of National and State Assessments of Educational Progress, 2000-04-23 The National Assessment of Educational

Progress NAEP known as the nation's report card has chronicled students' academic achievement in America for over a quarter of a century. It has been a valued source of information about students' performance, providing the best available trend data on the academic achievement of elementary, middle, and secondary school students in key subject areas. NAEP's prominence and the important need for stable and accurate measures of academic achievement call for evaluation of the program and an analysis of the extent to which its results are reasonable, valid, and informative to the public. This volume of papers considers the use and application of NAEP. It provides technical background to the recently published book *Grading the Nation's Report Card: Evaluating NAEP and Transforming the Assessment of Educational Progress* (NRC, 1999) with papers on four key topics: NAEP's assessment development, content validity, design, and use; and more broadly, the design of education indicator systems.
