## **How To Build A Chopper Motorcycle:**

**How to Build a Cheap Chopper** Timothy Remus, Wolfgang Publications Inc, 2004 Choppers don't have to cost thirty thousand dollars. In fact, a chopper built at home can be had for as little as five thousand dollars. The key is the use of a donor bike for most of the components. *How to Build a Cheap Chopper* documents the construction of four inexpensive choppers with complete start to finish photo sequences. Least expensive is the metric chopper based on a 1970s vintage Japanese four cylinder engine and transmission installed in a hardtail frame. Don't look for billet accessories or a fancy candy paint job on this one. Next up price wise are two bikes built using Buell Sportster drivetrains. The fact is a complete used Buell or Sportster can be had for thousand dollars or less. Now you've got more than an engine, you have wheels and tires, brakes, hardware, lights, harness, and some sheet metal. Bolt all that stuff to a simple hardtail frame to create an almost instant chopper. Most lavish but still cheap by comparison with many of the bikes built today is a big twin chopper built from carefully chosen aftermarket parts. A RevTech engine and five speed tranny set in a Rolling Thunder frame. Accessorize from the swap meet and add a simple one color paint job to create a bike no one needs to be ashamed of.

*How to Build a West Coast Chopper Kit Bike* Mike Seate, This book presents a step by step guide to building a West Coast Chopper's C F L kit. Kit choppers are hot commodities. While few people can afford to buy a custom built chopper from one of the high end builders like Jesse James bikes that often sell for 100,000 or more, many can afford to buy such bikes in kit form. Because of this, all the high end builders sell their creations in kit form. For example, while Jesse James might build perhaps a dozen custom bikes per year, he sells hundreds of chopper kits. The same is true of any number of other builders like Matt Hotch, Cyril Huze, and Paul Yaffe. Authored by Mike Seate and featuring the photography of Joe Appel, this book is a step by step how to guide for anyone building a kit chopper.

**Billy Lane's How To Build Old School Choppers, Bobbers and Customs** Billy Lane, Billy Lane is the fastest rising star among the high profile custom chopper builders, and in this book he offers many of his secrets for building a chopper that will stand out in a crowd. This is the ultimate resource for any chopper builder, a book designed as a step by step guide to building any type of custom motorcycle. This book also covers custom building beyond the chopper genre, including the building of bobbers, an old school style of custom that has been revived as a hot trend. Predating choppers, they are on the cutting edge of current biker cool for real riding and are much safer and more functional than choppers. Billy Lane has been featured several times on the Discovery Channel's top rated series *Biker Build Off* and the *Monster Garage* premiere episode. Plus, he was *Easyriders* Builder of the Year and winner of numerous national Best in Show awards. This book shows Billy's inside secrets of constructing a complete motorcycle from hand fabricating metalwork to adding the detail parts that will make your bike your own creation and stand out from the crowd. Hundreds of color photographs will lead the builder through the construction process.
