Consumer Price Index Manual International Monetary

Fund,2004-08-25 The consumer price index CPI measures the rate at which the prices of consumer goods and services are changing over time It is a key statistic for economic and social policymaking and has substantial and wide ranging implications for governments businesses and households This important and comprehensive Manual provides guidelines for statistical offices and other agencies responsible for constructing CPIs and explains in depth the methods that are used to calculate a CPI It also examines the underlying economic and statistical concepts and principles needed for making choices in efficient and cost effective ways and for appreciating the full implications of those choices The Analytic Hierarchy Process (AHP) in Software Development (Digital Short Cut) Bijay K. Jayaswal,Peter C. Patton,Ernest H. Forman,2007-03-01 This is the eBook version of the printed book The Analytic Hierarchy Process AHP is an advanced technique that supports decision makers in structuring complex decisions quantifying intangible factors and evaluating choices in multiobjective decision situations It is a comprehensive and rational decision making framework that provides a powerful methodology for determining relative worth among a set of elements AHP is especially suitable for complex decisions that involve the comparison of decision elements which are difficult to quantify The AHP and its more recent version the Analytic Network Process ANP were developed by Dr Thomas Saaty and have been applied in a wide variety of decision situations in organizations worldwide AHP is particularly applicable in managing software complexity and in Quality Function Deployment QFD as presented in Chapter 11 of the book Design for Trustworthy Software This short cut illustrates the application of AHP in prioritizing complex design issues It also shows how AHP and its supporting software Expert Choice EC can handle much higher levels of complexities accurately and expeditiously than the prioritization matrices introduced in Chapter 7 of Design for Trustworthy Software In addition to solutions facilitated by EC this short cut also illustrates two known approximations to AHP solutions using manual calculations Manual calculations can be used to solve relatively less complex problems They are presented in this short cut to illustrate the first principles and the steps involved in AHP This short cut is a reproduction of Chapter 8 of the book Design for Trustworthy Software and introduces AHP with a simple example It can be used either as a methodology in trustworthy software design process or as a standalone introductory presentation on AHP This short cut should be of interest to software and quality professionals In particular it would be of value to the CMMI Six Sigma and DFSS communities worldwide especially those who have acquired or plan to acquire Green Belt Black Belt Master Black Belt or similar competencies in various quality management disciplines It should also be a useful resource for students and academicians of various programs at senior undergraduate and graduate levels and for those preparing for ASQ s Certified Software Quality Engineer CSQE examination What This Short Cut Covers 3 Introduction 4 Prioritization Complexity and the Analytic Hierarchy Process 4 Multiobjective Decision Making and AHP 5 Case Study 1 Solution Using Expert Choice 12 Approximations to AHP with Manual Calculations 22 Conclusion 33 Key Points 33 Additional Resources 34 Internet Exercises 34 Review Questions 34 Discussion Questions and Projects 35 Problems 36 Endnotes 45 What s in the Book Design for

Sustainable Use and Development of Watersheds I. Ethem

Gönenç,Angheluta Vadineanu,John P. Wolflin,Rosemarie C. Russo,2008-07-15 John Wesley Powell U S scientist and geographer put it best when he said that a watershed is that area of land a bounded hydrologic system within which all living things are inextricably linked by their common water course and where as humans settled simple logic demanded that they become part of a community Watersheds come in all shapes and sizes They cross sectorial boundaries e g county state province and country No matter where you are you are in a watershed World wide watersheds supply drinking water provide recreation and respite and sustain life Watersheds are rich in natural capital producing goods agriculture and fisheries products and services industry and technology for broad geographic areas In many countries at the base of watersheds where tributaries empty into large water bodies e g estuaries seas oceans are centers of society and are typically densely populated areas These areas serve as concentrated centers of the socio economic system They also are centers of domestic and international trade tourism and commerce as well as the center of governments capitals where local regional and national legislatures are located As we all live in a watershed our individual actions can directly affect it The cumulative effects of all the individual actions of everyone within a watershed may be and often are devastating to the quality of water resources and affect the health of living things including humans Therefore watershed systems are highly subject to threat to human security and peace
