The Journal of the National Education Association National Education Association of the United States,1927 **Practical Home Economics** ,1929 The Sept issue contains the annual Teaching aids section **Gendered Capitalism** Paula De La Cruz-Fernández,2021-05-05 *Gendered Capitalism Sewing Machines and Multinational Business in Spain and Mexico 1850 1940* is a history of the gendered corporation a study that examines how ideas and ideals about domesticity and the cultures of sewing and embroidery being gender specific shaped the US headquartered Singer Sewing

Machine Company's operations around the world. In contrast to production driven and culture neutral analyses of the multinational enterprise this book focuses on both the supply and the demand side to argue that consumers and the cultural worlds of those mainly women using the sewing machine for personal purposes or for the market shaped corporate organization. This book is a global history of Singer but it also focuses on the cases of Spain and Mexico to highlight nations where the sewing machine multinational never established manufacturing operations. Casa Singer was a mostly profitable and a long term selling and marketing operation in both countries. Gendered Capitalism demonstrates that local Spanish and Mexican agents both men and women developed and expanded Singer's selling system to the extent that the multinational company was seen as domestic both in the location sense and because of its focus on the private sphere of the home. By bringing the cases of Spain and Mexico and the cultural everyday realm of practices related to sewing and embroidery that the sewing machine was part of to the center of the study of international business Gendered Capitalism further reveals the layers of complexities and multitudes that conform the history of global capitalism. This book will be of interest to readers and scholars in the fields of business history economic cultural history management studies international business women's history gender studies and the history of technology.

The Millionaire Mind Thomas J. Stanley, 2010-12-03 The New York Times bestseller that gives readers with an entrepreneurial turn of mind road maps on how millionaires found their niches. USA Today The author of the blockbuster bestseller *The Millionaire Next Door: The Surprising Secrets of America's Wealthy* shows how self made millionaires have surmounted shortcomings such as average intelligence by carefully choosing their careers taking calculated risks and living balanced lifestyles while maintaining their integrity. Dr Thomas J Stanley also builds on his research from *The Millionaire Next Door* and takes us further into the psyche of the American millionaire. Stanley focuses in on the top one percent of households in America and tells us the motor behind the engine what makes them tick. His findings on how these families reached such financial success are based on in depth surveys and interviews with more than thirteen hundred millionaires. A very good book that deserves to be well read. The Wall Street Journal Worth every cent. It's an inspiration for anyone who has ever been told that he wasn't smart enough or good enough. Associated Press A high IQ isn't necessarily an indicator of financial success. Stanley tells us that the typical millionaire had an average GPA and frugal spending habits but good interpersonal skills. Entertainment Weekly Ideas bigger than the next buck. Orlando Sentinel

Fabricating Consumers Andrew Gordon, 2011-11-01 Since its early days of mass production in the 1850s the sewing machine has been intricately connected with the global development of capitalism. Andrew Gordon traces the machine's remarkable journey into and throughout Japan where it not only transformed manners of dress but also helped change

patterns of daily life class structure and the role of women As he explores the selling buying and use of the sewing machine in the early to mid twentieth century Gordon finds that its history is a lens through which we can examine the modern transformation of daily life in Japan Both as a tool of production and as an object of consumer desire the sewing machine is entwined with the emergence and ascendance of the middle class of the female consumer and of the professional home manager as defining elements of Japanese modernity
