Kenyan Public Universities in the Age of Internationalization Iddah Aoko Otieno, 2018-06-20 This book presents a comprehensive institutional level analysis of a single public institution of higher education in the Republic of Kenya using the case study method of investigation It is the first case study to use both qualitative and quantitative research methodology to illuminate the experiences of Kenyan public universities with internationalization post independence Focusing on Kenya s oldest national

public university the University of Nairobi's experimentation with internationalization Kenyan Public Universities in the Age of Internationalization is a first in the East African region The book argues that attempts by institutions of higher education in Africa to engage in internationalization with the much more older and well established IHEs in the developed world has perpetuated the colonial legacy that has relegated these institutions to the position of the Other in the new international order Several policy implications are offered on what it means to participate in internationalization from a marginal peripheral position The conventional assumption that political independence would bring to most African countries and by extension their national public universities a period of freedom from political economic and cultural subjugation and exploitation by the more powerful world nations has proved elusive This book is intended for a broad audience in the field of Comparative International Education The mixed research methods used in this book will certainly appeal to instructors students and general readers interested in understanding the experiences of historically marginalized developing World institutions of higher education with internationalization *Thus Until* Emilia Ilieva, Reuben Matheka, 2025-08-04 *Thus Until*

Science Research and Education in Africa Alain L. Fymat, Joachim Kapalanga, 2017-03-07. For various economic and political reasons, many African countries lag behind the rest of the industrialized world in scientific and medical research and development. However, the presence of intellectual islands scattered across the continent gives hope that this is only a transient situation on the cusp of undergoing a profound and beneficial change. For this reason, the Society for the Advancement of Science in Africa was established to catalyze and contribute to this needed evolution. Its mission is to contribute to Africa's economic advancement and sustainability through science research, education, and innovation. This book provides a selection of papers from the Advancement of Science in Africa's third annual conference. The conference was held under the overarching theme of science research and education in Africa, with several important sub-themes including, but not limited to, improving health research and disease surveillance, education, epidemic diseases with high mortality, promoting women's interest in science careers, fostering youth development with science education. The collection illustrates how, although the chapter contributors come from various countries and universities representing their own academic research, they all share a common interest in advancing science research and education in Africa.
