EventDV, 2006 Romance Linguistics 2009 Sonia Colina, Antxon Olarrea, Ana Maria Carvalho, 2010-11-25 This volume contains a selection of twenty four peer reviewed papers from the 39th annual Linguistic Symposium on Romance Languages LSRL held at the University of Arizona in 2009 Contributions cover a wide variety of topics in the areas of phonology phonetics syntax morphology and diachronic Romance linguistics with an emphasis on language variation and change Among the languages and varieties of Romance analyzed are Spanish French Italian Portuguese Romanian Catalan Old French Old Occitan and Hispano Romance The research in this volume points to a cohesiveness in Romance linguistics that lies in the integration of up to date linguistic research with a comparative tradition and the in depth study of a language family The work presented will be of interest to scholars of Romance linguistics and of linguistics alike **Manual de história oral** Alberti, Verena, 2018-05-03 Pesquisadores e estudiosos das diversas reas das ci ncias humanas n o podem prescindir desta obra de refer ncia abrangendo todas as etapas de prepara o realiza o e tratamento de entrevistas de hist ria oral O manual fornece orienta es preciosas para a implanta o de programas de hist ria oral a prepara o e realiza o de entrevistas e o tratamento e difus o do acervo considerando as novas tecnologias de informa o dispon veis *Sound perception and production in a foreign language* Nimz, Katharina, 2016-04-13 The present study addresses the question of how German vowels are perceived and produced by Polish learners of German as a Foreign Language It comprises three main experiments a discrimination experiment a production experiment and an identification experiment With the exception of the discrimination task the experiments further investigated the influence of orthographic marking on the perception and production of German vowel length It was assumed that explicit markings such as the Dehnungs h lengthening h could help Polish GFL learners in perceiving and producing German words more correctly The discrimination experiment with manipulated nonce words showed that Polish GFL learners detect pure length differences in German vowels less accurately than German native speakers while this was not the case for pure quality differences The results of the identification experiment contrast with the results of the discrimination task in that Polish GFL learners were better at judging incorrect vowel length than incorrect vowel quality in manipulated real words However orthographic marking did not turn out to be the driving factor and it is suggested that metalinguistic awareness can explain the asymmetry between the two perception experiments The production experiment supported the results of the identification task in that lengthening h did not help Polish learners in producing German vowel length more correctly Yet as far as vowel quality productions are concerned it is argued that orthography does influence L2 sound productions because Polish learners seem to be negatively influenced by their native grapheme to phoneme correspondences It is concluded that it is important to differentiate between the influence of the L1 and L2 orthographic system On the one hand the investigation of the influence of orthographic vowel length markers in German suggests that Polish GFL learners do not make use of length information provided by the L2 orthographic

system On the other hand the vowel quality data suggest that the L1 orthographic system plays a crucial role in the acquisition of a foreign language It is therefore proposed that orthography influences the acquisition of foreign sounds but not in the way it was originally assumed Bioacoustics ,2005 **Duetting and Turn-Taking Patterns of Singing**
