Bergen, 2021-08-03 The world's leading expert on Osama bin Laden delivers for the first time the riveting The New York Times definitive biography of a man who set the course of American foreign policy for the 21st century and whose ideological heirs we continue to battle today In The Rise and Fall of Osama bin Laden Peter Bergen provides the first reevaluation of the man responsible for precipitating America's long war with al Qaeda and its decedents capturing bin Laden in all the dimensions of his life as a family man as a zealot as a battlefield commander as a terrorist leader and as a fugitive The book sheds light on his many contradictions he was the son of a billionaire yet insisted his family live like paupers He adored his wives and children depending on his two wives both of whom had PhDs to make critical strategic decisions Yet he also brought ruin to his family He was fanatically religious but willing to kill thousands of civilians in the name of Islam He inspired deep loyalty yet in the end his bodyguards turned against him And while he inflicted the most lethal act of mass murder in United States history he failed to achieve any of his strategic goals In his final years the lasting image we have of bin Laden is of an aging man with a graying beard watching old footage of himself just as another dad flipping through the channels with his remote In the end bin Laden died in a squalid suburban compound far from the front lines of his holy war And yet despite that unheroic denouement his ideology lives on Thanks to exclusive interviews with family members and associates and documents unearthed only recently Bergen's comprehensive authoritative and compelling H R McMaster author of Dereliction of Duty and Battlegrounds The Fight to Defend the Free World portrait of Osama bin Laden reveals for the first time who he really was and why he continues to inspire a new generation of jihadists The Sun Claudio Vita-Finzi, 2008-12-15 This is an account of the many ways in which the Sun affects our planet how its influence has changed over the last few centuries and millennia and the extent to which we can predict its future impact The book is the first to integrate astronomical geological climatic and social aspects of the Sun It includes a topical treatment of solar contribution to global warming and demonstrates how wild and variable is the so called Solar Constant Our nearest star is a complex machine which needs to be treated with caution and this book will equip every reader with the knowledge that is required to understand the benefits and dangers it can bring Faber & Kell's Heating & Air-conditioning of Buildings Doug

*Acute Religious Experiences* Richard Saville-Smith, 2023-02-09 This book engages the problem of how in the 21st century we are to speak about experiences of the extraordinary anomalous extreme which occur on a transhistorical and transcultural basis Critical readings of seminal texts show how 20th century theoreticians in the humanities sought to erase madness from their irrational subjects This propensity to sanitize madness in the study of religions was mirrored by the instinct of psychiatrists to degrade religious experiences by reducing mad consciousness to psychosis or dissociation Richard Saville Smith introduces explanatory pluralism as a way of recognizing these disciplinary biases and mad studies as a way of negotiating this understanding The disproportionate significance of madness in shaping the fabric of the human story can then be recovered from both erasure and dismissal to be given the recognition previously denied as acute religious experiences *Acute Religious Experiences* divides into three sections beginning with readings of William James's pathological programme Rudolf Otto's numinous T K Oesterreich's possession Mircea Eliade's shamanism Walter Stace's mysticism Walter Pahnke's psychedelic experience and Abraham Maslow's peak experiences These ideas are shown to constitute the beginnings of a fractured discourse on the irrational In part two contemporary psychiatry's Diagnostic and Statistical Manual DSM and Foucault's *History of Madness* are re-read to reposition madness as not necessarily pathological This opens the way for the identification of acute religious experiences as a new holistic and post colonial approach through which religious data can be organized and addressed on a comparative basis In part three The Gospel of Mark is re-read as a case study to demonstrate the novel insights which flow from the identification of acute religious experiences Richard Saville Smith draws on his own experiences of madness and his PhD from the School of Divinity at The University of Edinburgh to elucidate his research
