

Static Routing Lab

Campus Network Design & Operations Workshop

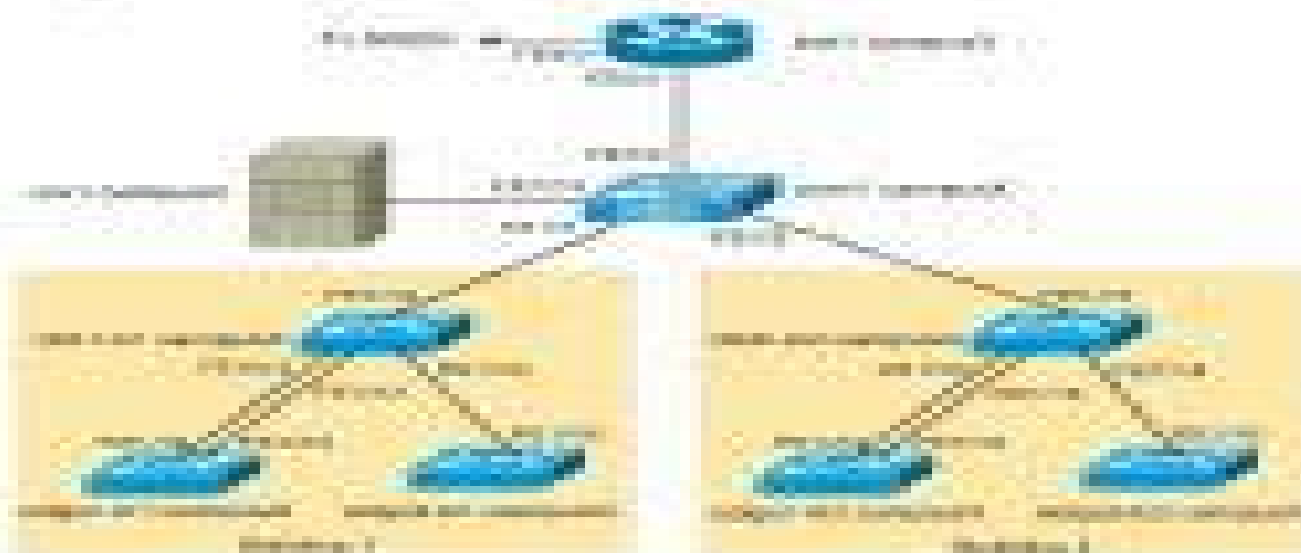

Introduction

The purpose of this lab is to make add Layer 3 functionality to our existing Network Layer 2 network. The Core Switches have ports 1/1 connected to left core in 10.10.10.1, routing between the different VLANs configured on it. However, we now want to give this campus connectivity to the border router and onwards to the WAN and the Internet.

The class will continue in the 3 groups with each group being assigned one campus to configure, ultimately all will be required to configure routing for the border router and onto the Internet (which we have given settings as a guide, see the notes).

Lab Layout

The following diagram shows the layout of the devices and all the links for each campus.
