As the price of gas keeps getting higher and higher, so does the demand of alternative power sources. Though the vehicles we drive now have been good enough for the past 100 years, they are not efficient enough for our needs today. We need to find new ways to create fuel efficient vehicles. Whether it is gasoline, battery, hydrogen, solar, or even wind powered, we must find alternative ways to increase gas mileage. But the truth is that engineers are getting very close to solving that problem. Some car companies have already developed a hydrogen powered car. Though they don't have all the bugs worked out yet, they have made a very promising start towards using hydrogen power.

Another reason that fuel mileage should be increased is because, in more than one way, it would boost our economy. As of right now our economy is slowly sliding into a recession. If congress were to pass a law requiring that all vehicles being
