September 2018

ACFT Field Test Highlight Poster Final OVERVIEW

The Army will replace the Army Physical Fitness Test APFT with the Army Combat Fitness Test ACFT as the physical fitness test of record beginning in FY21 To accomplish this the ACFT will be implemented in three phases

Phase 1 Initial Operating Capability

IOC includes a limited user Field Test with approximately 60 battalion sized units from across all components of the Army

While the ACFT is backed by thorough scientific research and has undergone several revisions there are still details that have not been finalized

The ACFT requires a testing site with a two mile run course and a flat field space approximately 40 x 40 meters

The field space should be grass well maintained and cut or artificial turf that is generally flat and free of debris

While maintaining testing standards and requirements commanders will make adjustments for local conditions when necessary

The start and finish point for the two mile run course must be in close proximity to the Leg Tuck station

When test events are conducted indoors the surface must be artificial turf only

Wood and rubberized surfaces are not authorized as they impact the speed of the Sprint Drag Carry

When environmental conditions prohibit outdoor testing an indoor track may be used for the 2 Mile Run

The Test OIC or NCOIC are responsible to inspect and certify the site and determine the number of testing lanes

There should not be more than 4 Soldiers per testing group for the SPT HRP and SDC

The OIC or NCOIC must add additional lanes or move Soldiers to a later testing session to ensure no more than 4 Soldiers per testing group

Concerns related to Soldiers graders or commanders will be addressed prior to test day

The number of lanes varies by number of Soldiers testing

A 16 lane ACFT site will have the following ACFT specific test equipment requirements

16 hexagon trap bars 60 pounds each with a set of locking collars

While all NSN approved hexagon bars must weigh 60 pounds there is always a small manufacturer s production tolerance

The approved weight tolerance for the hexagon bar is 2 pounds

58 62 pounds

Weight tolerance for the hexagon bar and therefore the 3 Repetition Maximum Deadlift does not include the collars

On average hexagon bar collars weigh 2 0 pounds per pair and are considered incidental to the total weight of the MDL weight

Approximately 3 000 lbs of bumper plates 16 x 10 lb

medicine ball 16 x nylon sled with pull straps 32 x 40 lb kettle bells

Permanent or mobile pull up bars 16 x pull up bars at approximately 7 5 feet off the ground with step ups for shorter Soldiers

Common unit equipment for set up and grading

16 stop watches 8 x 25m tape measures 8 x wooden or PVC marking sticks for the SPT

One stick for every two lanes 70 x 18
